Chapter 1

Main Settings Item Sections and Fields

A Main Settings item defines presentation settings in a Sitecore Intranet site, for example: button titles, a top logo, date/time formats, email message content, etc. Main Settings items are located in the following folder:

/sitecore/system/IntranetSettings/MainSettings.

This document describes the settings available in such item. The item contains the following sections:

1.1 Data Section
1.2 Update Index
1.3 Personal Context
1.4 Frontend Editing
1.5 Backend Editing
1.6 Data Channel
1.7 News Options
1.8 Author
1.9 List Options
1.10 Send Page
1.11 Forum
1.12 Marketplace
1.13 Vacation Signup
1.14 Activity Search
1.15 Search
1.16 Slideshow
1.17 MediaLibrary
1.18 System Folders

The Norman Furniture demo site is used as an example in this document.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.1 Data Section

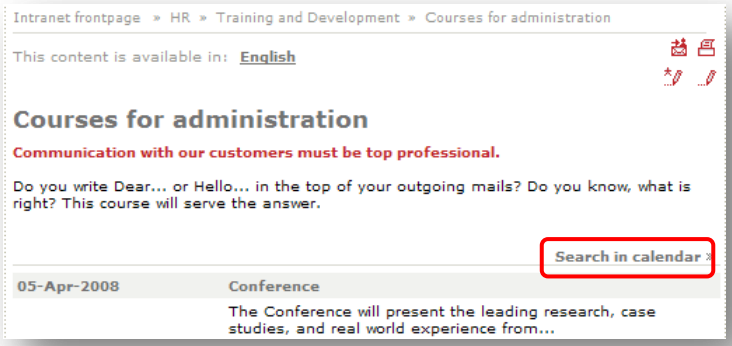
The description of settings located in the Data section of the Main Settings item.

1.1.1 Activity linktext (activitylinktext)

Type: text

Description: This setting contains a link title which will be displayed while rendering an item based on the Intranet.Activitylist template if there is at least one activity under /sitecore/content/Intranet/Home/Site tools/Activities location which meets the condition specified in the Activity Types field of the current Activity List item.

Front-end view:

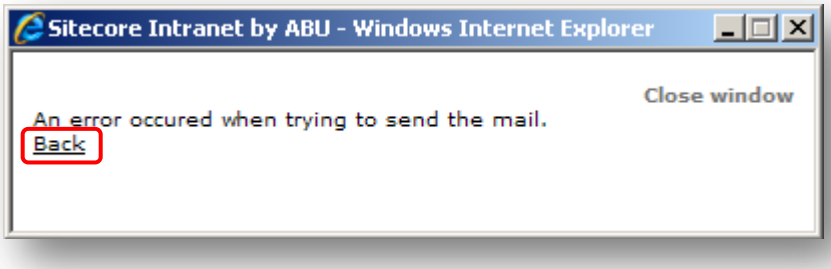


1.1.2 Back link text (backlinktext)

Type: text

Description: This setting is used to specify single title for all ‘back’ links on the site. By default this setting affects only the SendPage layout behaviour.

Front-end view:



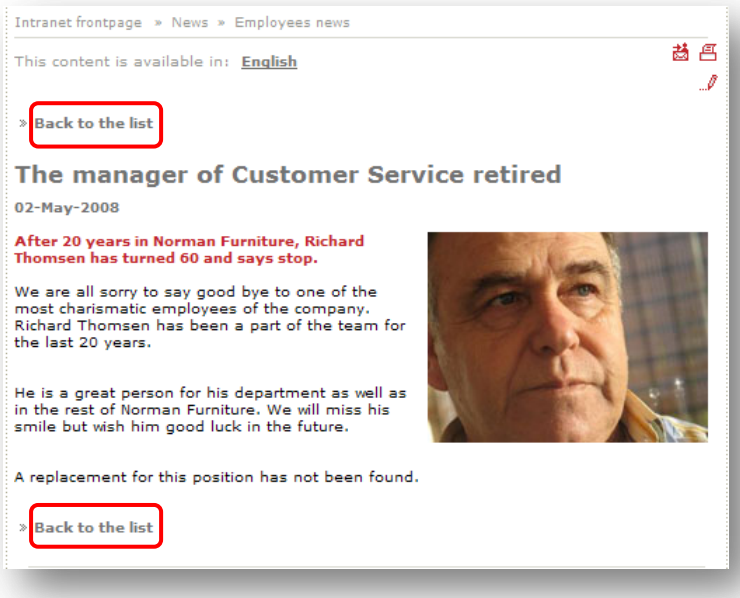
1.1.3 Back to overview link text (backtooverviewlinktext)

Type: text

Description: This setting is used to specify single title for all ‘back’ links which lead from an item to a parent item containing the overview list (for example ‘back’ link on specific news page which leads to the news overview list).

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Front-end view:

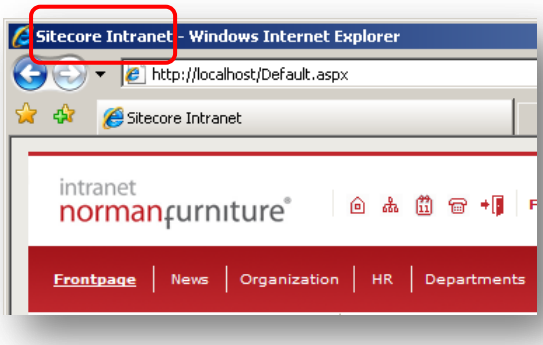


1.1.4 Browser title (browsertitle)

Type: text

Description: This setting specifies the title of the browser window when browsing the site..

Front-end view:



1.1.5 Auto archiving - default number of days before archiving news items (DefaultArchiveDays)

Type: text

Description: This setting specifies a number of days after which news items will be archived. Note that value of the setting must exceed zero otherwise archiving process will not be performed.

1.1.6 Canteen: Coming week header (CanteenComingWeekHeader)

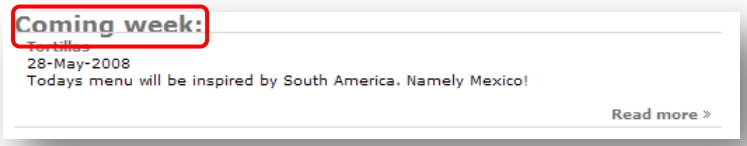
Type: text

Description: This setting specifies the heading which will be displayed when rendering an item based on the Intranet.Canteen template. Note that the heading will be rendered only if the item has at least

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

one descendant based on the Intranet.Canteen Menu template. The Date field of descendant item(s) must contain future date.

Front-end view:

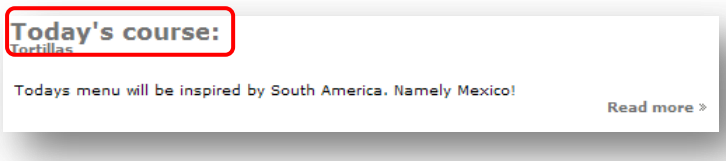


1.1.7 Canteen: Todays menu header (CanteenTodaysMenuHeader)

Type: text

Description: This setting specifies the heading which will be displayed when rendering an item based on the Intranet.Canteen template. Note that the heading will be rendered only if the item has a descendant based on the Intranet.Canteen Menu template. The Date field of descendant item(s) must contain today's date.

Front-end view:

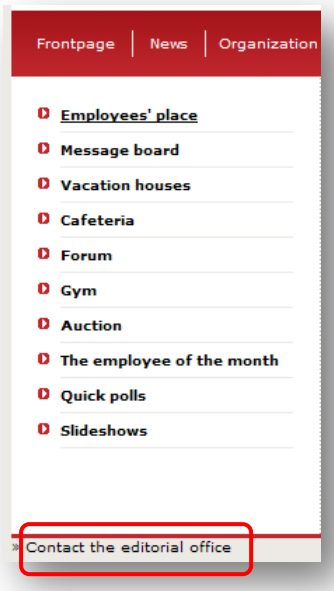


1.1.8 Footer (footer)

Type: rich text

Description: This setting specifies content for the footer of the site.

Front-end view:



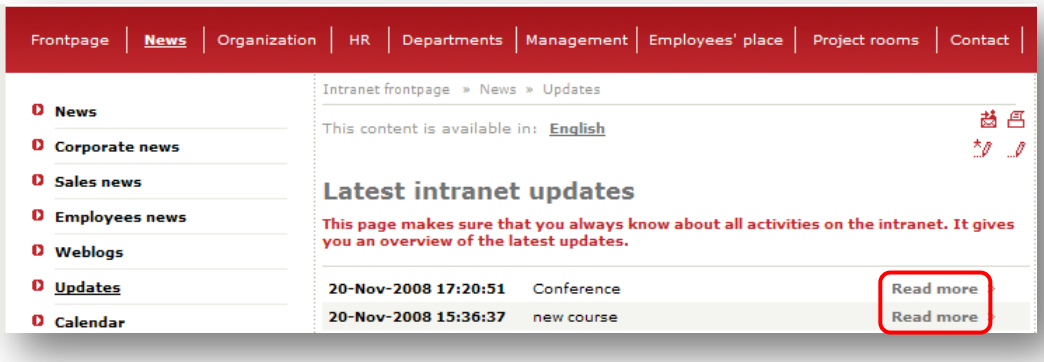
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.1.9 List: Read more text (listreadmoretext)

Type: text

Description: This setting is used to specify titles links which lead to a specific item from a list of items (for example links in a list of news which lead to a specific news page for each list entry). By default this setting is used while rendering items based on the following templates: Intranet.NewsArchive, Intranet.Canteen, Intranet.DocumentList, Intranet.FAQSection, Intranet.NewsSection. It is also used in the Intranet UpdateList sublayout (Updates page for news), Intranet WebPart TopNewsTeasers sublayout (Focus webpart), Intranet NewsFrontpage rendering (front page for all news).

Front-end view:

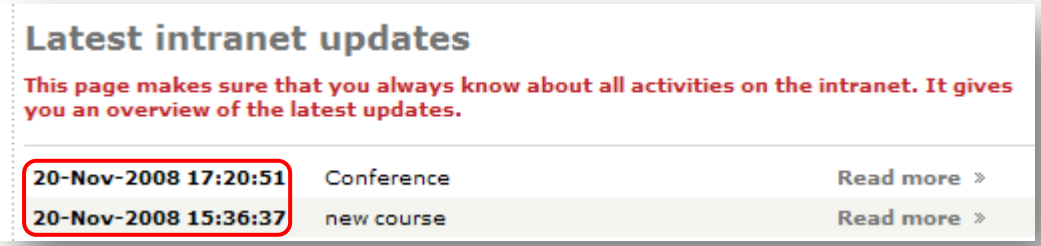


1.1.10 Long date format (LongDateFormat)

Type: text

Description: This setting is used to specify single long date format for the whole site. By default this setting is used while rendering items based on the following templates: Intranet.ForumItem, Intranet.Weblog.Entry, Intranet.PersonalWeblog.Root, Intranet.Weblog.Archive and Intranet.Weblog.Root.

Front-end view:



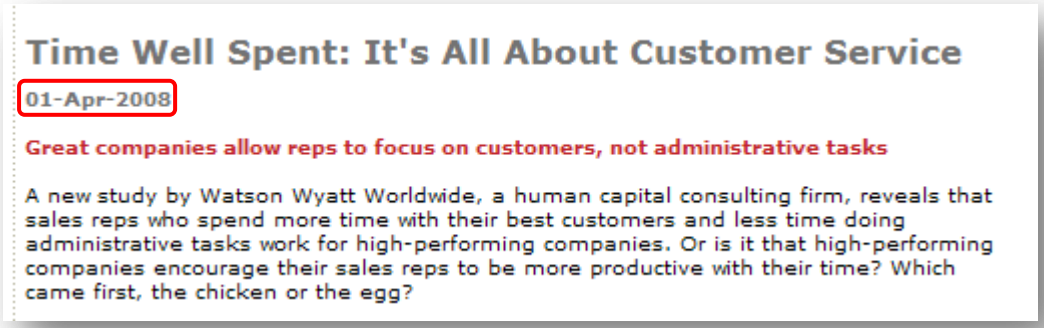
1.1.11 ShortDateFormat (ShortDateFormat)

Type: text

Description: This setting is used to specify single short date format for the whole site. By default this setting is used while rendering items based on the following templates: Intranet.Activitylist, Intranet.Activity, Intranet.Canteen, Intranet.UserProfile. It is also used in the Intranet Content rendering (it is assigned to the various templates and to the sitemap, phonebook, etc.), RssFullInfo and RssOverView renderings (both are used by the RSS web part).

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Front-end view:

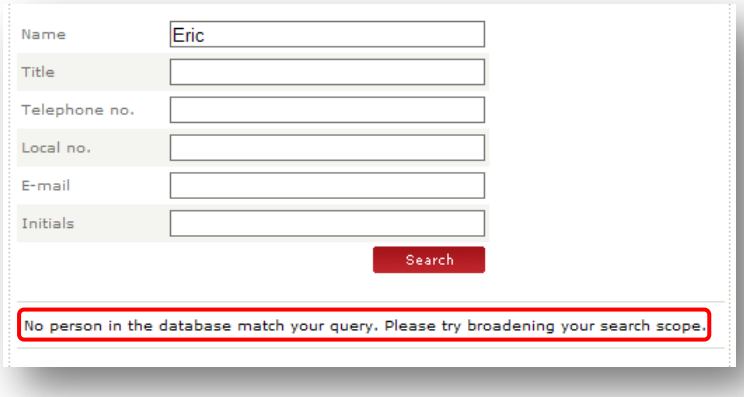


1.1.12 PhonebookNoResultsText (PhonebookNoResultsText)

Type: rich text

Description: This setting is used to specify the message which will be displayed if search in the phonebook returns no results. By default this setting is used in the Intranet PhoneBook sublayout (phonebook service).

Front-end view:



1.1.13 Also search in username when searching for initials (PhonebookSearchInUsername)

Type: checkbox

Description: This setting specifies the search logic that affects the Find employee web part and site phonebook search.

If the check box is cleared then the search for users (the Find Employee web part) will search for a given expression only in the “Name” and “Initials” fields of each user profile under /sitecore/content/Intranet/Home/UserInfo/. If the checkbox is selected, the Find Employee web part will search for a given expression also in the name of the user profile item (which coincides with the user login). The search is case-insensitive.

The setting also affects the ‘Initials’ field of the site phonebook search in the same way. The setting does not affect other fields of the phonebook search.

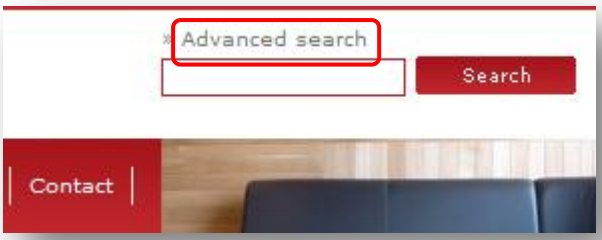
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.1.14 Searchtext, topmenu (searchadvanced)

Type: text

Description: This setting is used to specify the link title of the site search service (top right corner of the site).

Front-end view:



1.1.15 Searchlink (searchlink)

Type: link

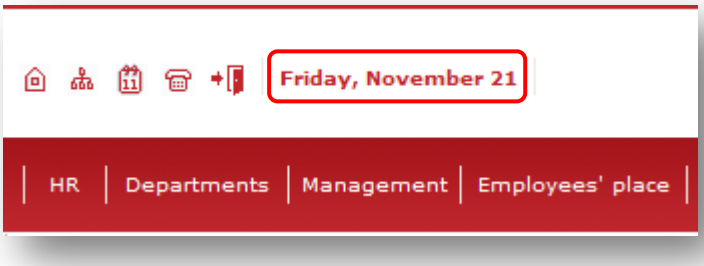
Description: This setting specifies the link to the site search service item. By default this setting contains the link to the /sitecore/content/Intranet/Home/Site tools/Search item.

1.1.16 Top date format (topdateformat)

Type: text

Description: This setting specifies the format of the date which is displayed at the top of the site.

Front-end view:



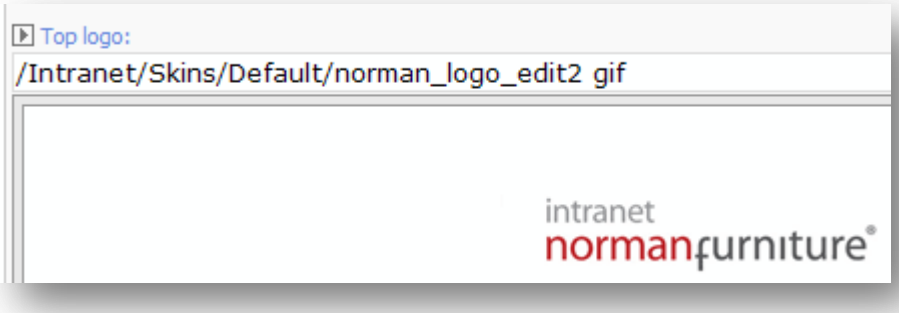
1.1.17 Top logo (toplogo)

Type: image

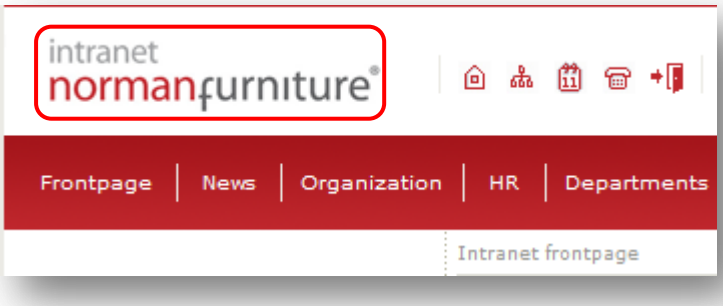
Description: This setting specifies a link to the image that is used as top logo of the site. Note that the setting will be used only if Toplogo field in Sitecore Intranet Portal skin item is not specified.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Back-end view:



Front-end view:

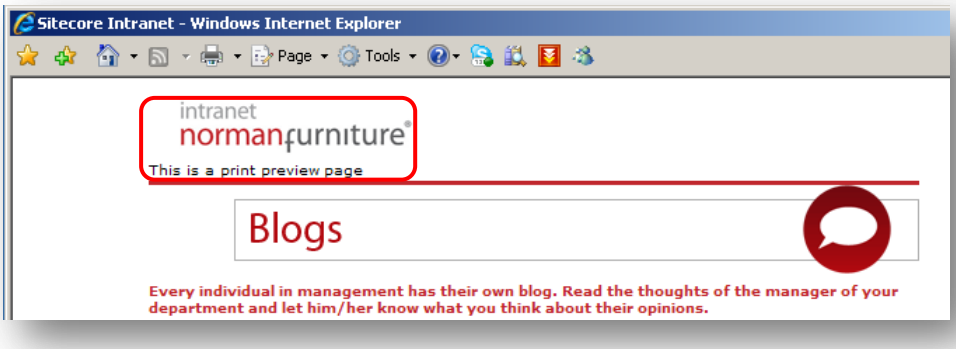


1.1.18 Printlayout body (printbody)

Type: rich text

Description: This setting specifies the content which is displayed at the top of a print preview page.

Front-end view:



1.1.19 FAQ: Moderated by text (FaqModeratedByText)

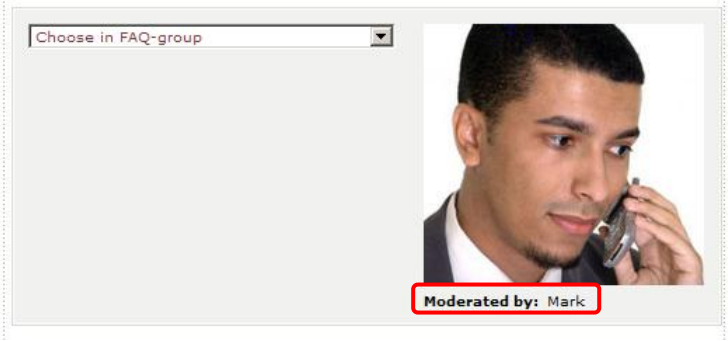
Type: text

Description:This setting specifies the text that will be displayed if the item Moderator name field specified (Moderator section of the item). The item must be based on the Intranet.FAQSection template.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Front-end view (edit mode):

Front-end view:

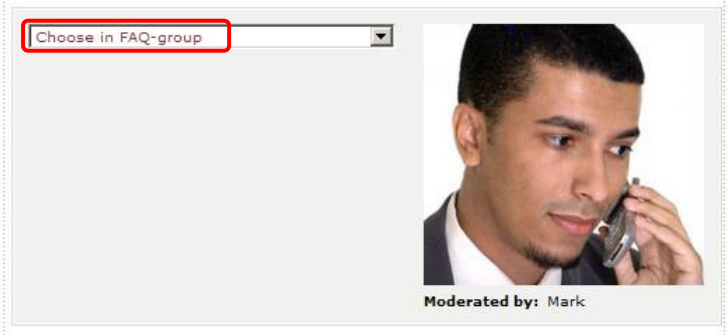


1.1.20 FAQ: Select Group text (FaqSelectGroupText)

Type: text

Description: This setting specifies the text for the default option of a list box that is displayed while rendering an item based on the Intranet.FAQSection template. The list box allows selecting a specific FAQ-group from the list of available groups.

Front-end view:



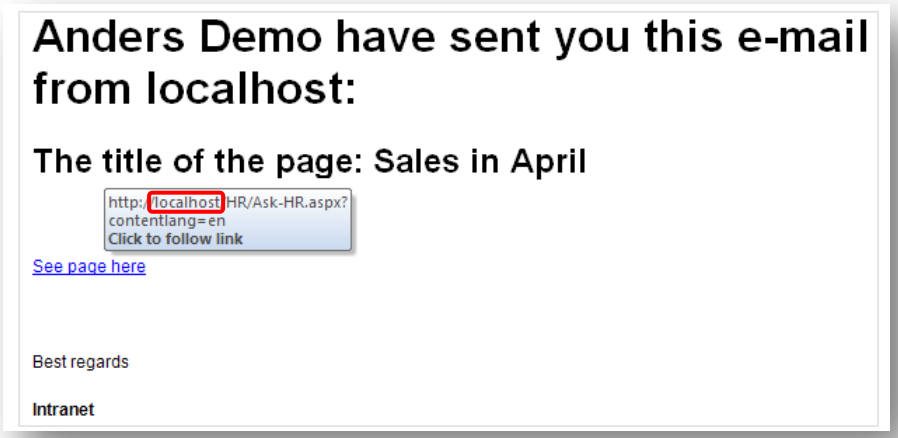
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.1.21 DomainPublicName - The hostname to use when generating URLs (e.g. 'Send to a friend') (DomainPublicName)

Type: text

Description: This setting specifies the hostname that is used while generating a link to a page of the 'Send to friend' service.

Front-end view:



1.1.22 ContentIsUnvailableInLanguage (ContentIsUnvailableInLanguage)

Type: text

Description: This setting specifies the message that is displayed if the user tries to view an item in unsupported language (e.g. the item does not have such language version).

Front-end view:

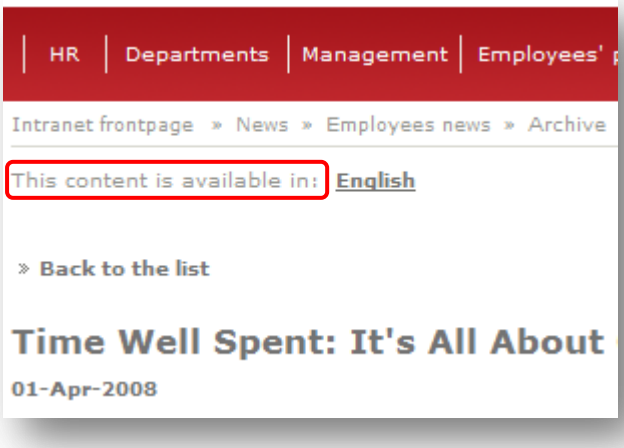
1.1.23 AvailableLanguagesText (AvailableLanguagesText)

Type: text

Description: This setting specifies the text that is displayed at the top of each page data section.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Front-end view:



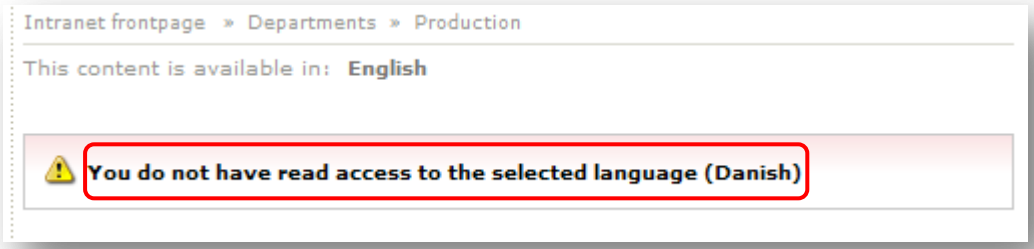
1.1.24 ContentIsProhibitedInLanguage (ContentIsProhibitedInLanguage)

Type: text

Description: This setting specifies the template for the message that is rendered instead of the page content if user tries to access an item in the language he/she has no read access to. Note that '{0}' sequence in the setting value will be replaced with the name of the corresponding language.

Sample value: You do not have read access to the selected language ({0}).

Front-end view:



1.1.25 TopMenuIncludeTemplates (TopMenuIncludeTemplates)

Type: tree list

Description: This setting determines which items should be included in the site top menu. If an item under the Home item is based on a template from the list then that item will be included in the site top menu.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.2 Update Index

The description of settings located in the Update index section of the Main Settings item.

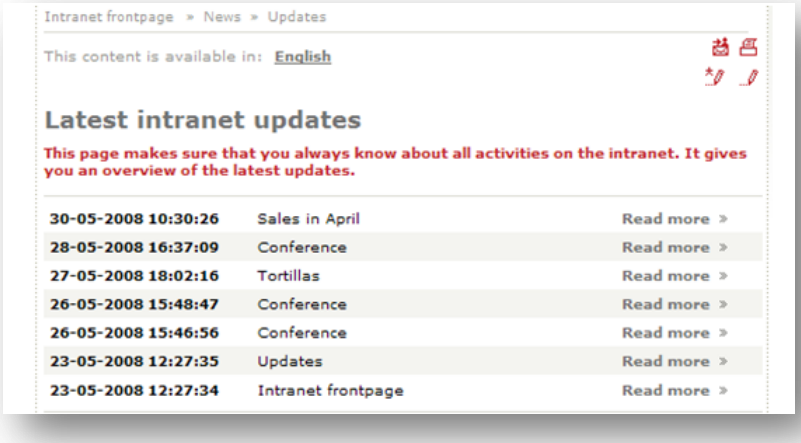
1.2.1 Number of days to show history for (UpdatedDays)

Type: text

Description: This setting determines the threshold (in days) for the editing history. The Updates page will only show items which were edited not longer than this number of days before. The setting affects the behavior of the Intranet UpdateList sublayout (in Norman Furniture demo site see *Intranet frontpage » News » Updates*). The update list will include items which match the Updated items - include templates setting.

If the value of the setting can't be parsed as integer then the default value '20' will be used.

Front-end view:



1.2.2 Updated items - include templates (UpdatedItemsIncludeTemplates)

Type: multilist

Description: Items based on templates specified in this setting will be included in the "update list" generated by the Intranet UpdateList sublayout (in Norman Furniture demo site see *Intranet frontpage » News » Updates*). For more information about the update list, see the "Number of days to show history for" setting.

1.2.3 Item where the UpdateList is placed (UpdateListLink)

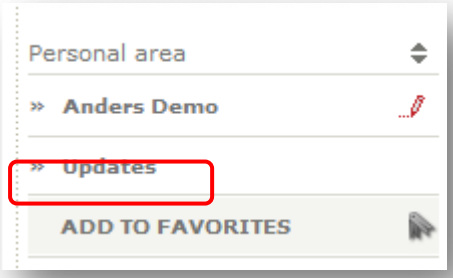
Type: tree

Description: This setting specifies the path to the item where the update list rendered. This path is rendered in the user personal area under the user name.

Sample value: /sitecore/content/Intranet/Home/News/Updates.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Front-end view:

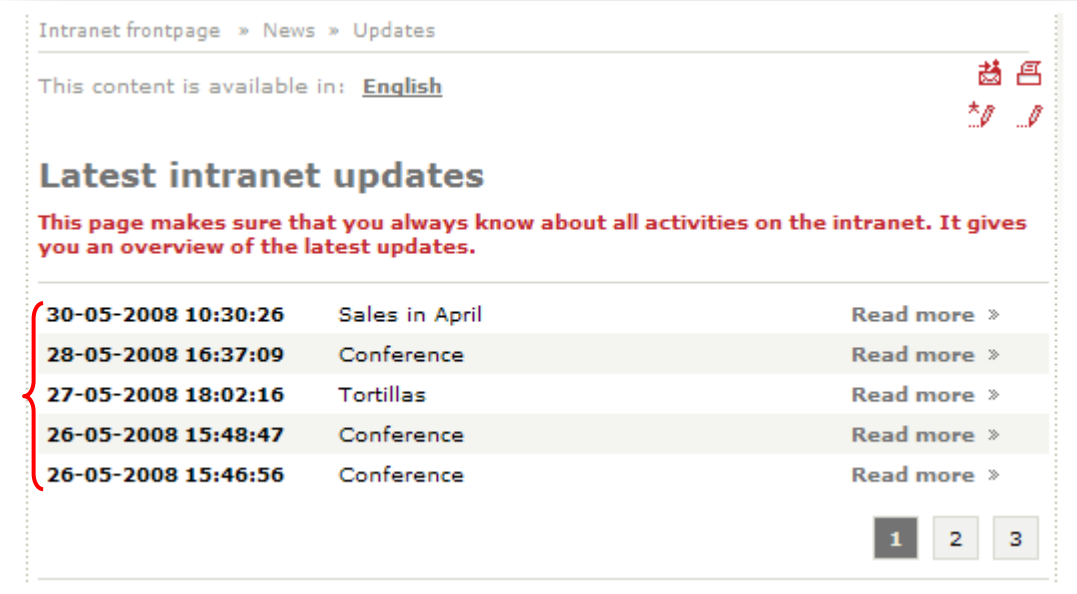


1.2.4 UpdateResultsPerPage (UpdateResultsPerPage)

Type: text

Description: This setting specifies the number of entries per page for site update service. If the value of the setting cannot be parsed as integer then the default value '25' will be used.

Front-end view:



Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.3 Personal Context

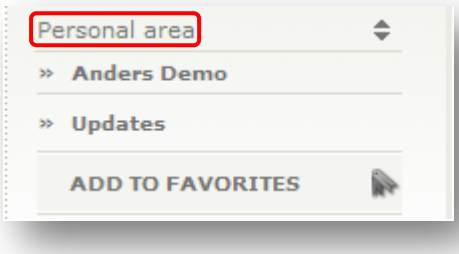
The description of settings located in the Personal context section of the Main Settings item.

1.3.1 Header (PersContextHeader)

Type: text

Description: This setting specifies the title for the site personal context section.

Front-end view:

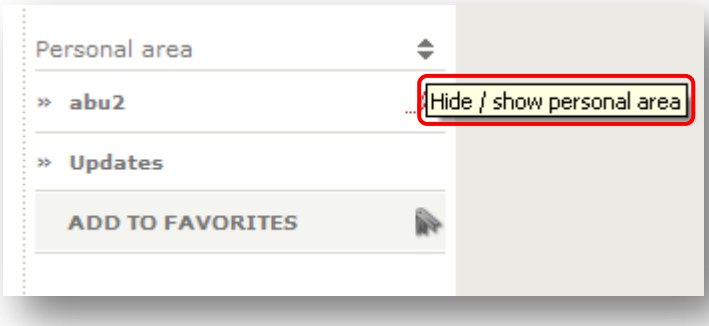


1.3.2 Toggle visibility - help text (PersContextToggleHelpText)

Type: memo

Description: This setting specifies the text of a tooltip for the collapse/expand button of the site personal area.

Front-end view:



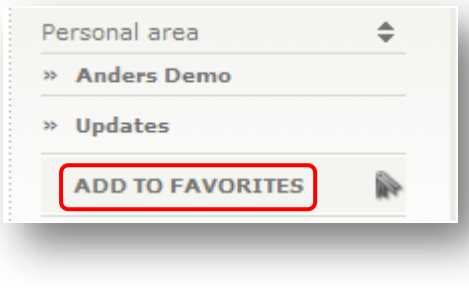
1.3.3 Favorites header (PersContextFavoritesHeader)

Type: text

Description: This setting specifies the heading for the site favorites section.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Front-end view:

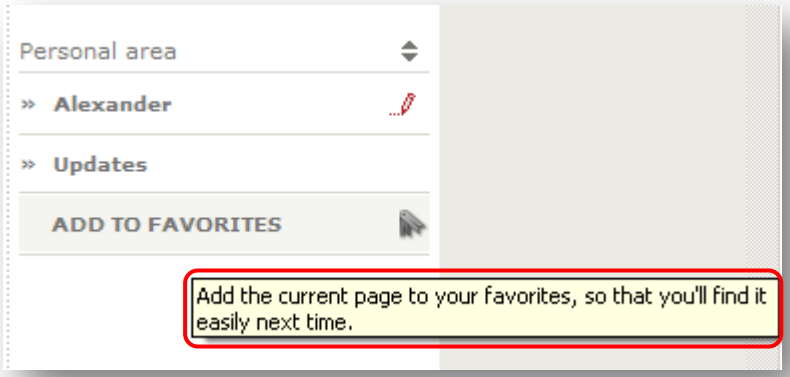


1.3.4 Favorites add - help text (PersContextFavoritesAddHelpText)

Type: memo

Description: This setting specifies the text of a tooltip for Add New button of the site favorites section.

Front-end view:



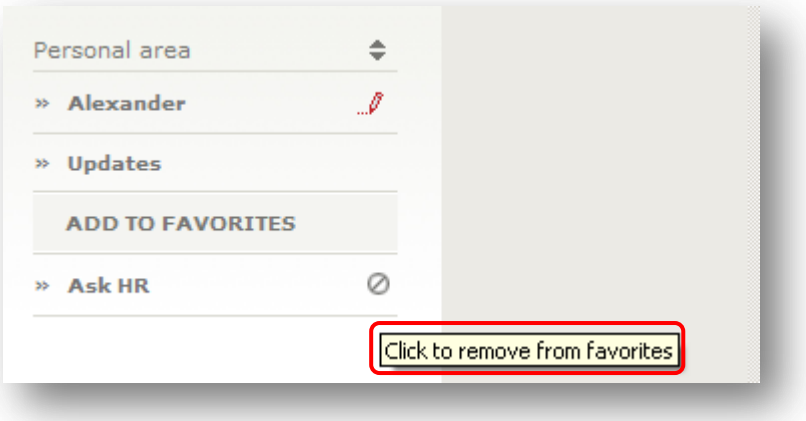
1.3.5 Favorites remove - help text (PersContextFavoritesRemoveHelpText)

Type: memo

Description: This setting specifies the text of a tooltip for Remove From Favorites button for each entry of the site favorites section.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Front-end view:

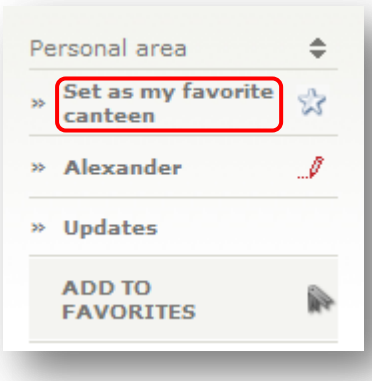


1.3.6 PersContextSetCanteen (PersContextSetCanteen)

Type: text

Description: This setting specifies the link title that is used to set the current item (if it is based on the Intranet.Canteen template) as preferred canteen for the user profile.

Front-end view:



Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.4 Frontend Editing

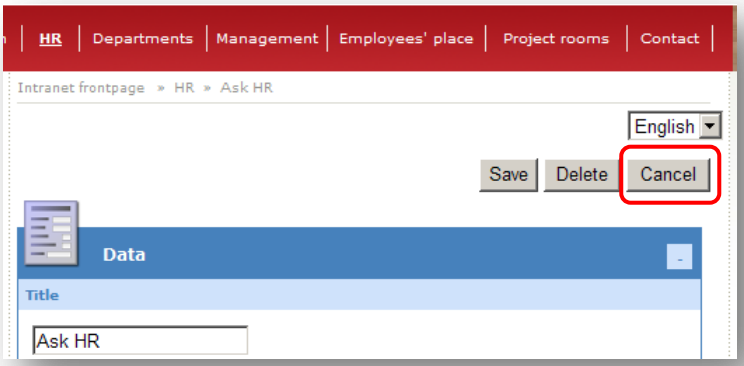
The description of settings located in the Frontend editing section of the Main Settings item.

1.4.1 Form: Cancel button text (frontendeditingbuttoncancel)

Type: text

Description: This setting specifies the text for the Cancel button of Sitecore Intranet Portal front-end editor.

Front-end view:

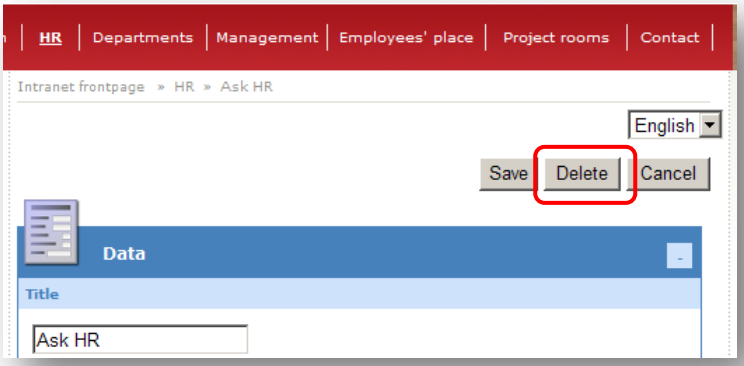


1.4.2 Form: Delete button text (frontendeditingbuttondelete)

Type: text

Description: This setting specifies the text for the Delete button of Sitecore Intranet Portal front-end editor.

Front-end view:



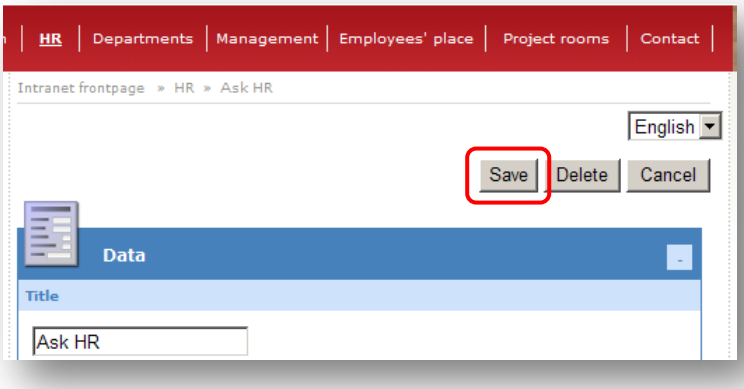
1.4.3 Form: Save button text (frontendeditingbuttonsave)

Type: text

Description: This setting specifies the text for the Save button of Sitecore Intranet Portal front-end editor.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Front-end view:

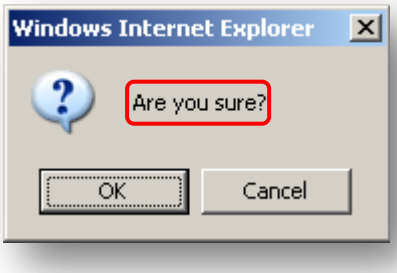


1.4.4 Form: Confirm Delete message (frontendeditingconfirmdelete)

Type: text

Description: This setting specifies the text of a message that is displayed to a user when he/she is asked to confirm deletion of the current item version in Sitecore Intranet Portal front-end editor.

Front-end view:

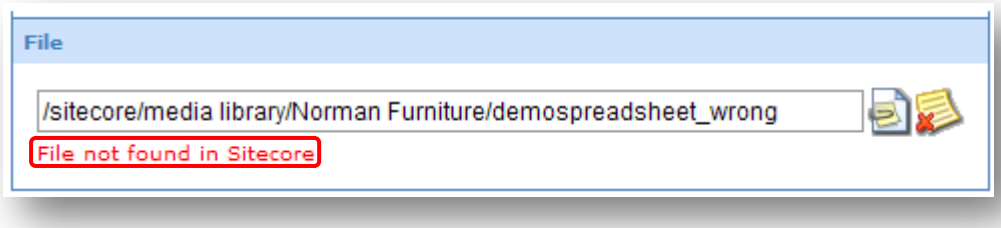


1.4.5 Error: File not found (frontendeditingerrorfilenotfound)

Type: text

Description: This setting specifies the text of a message that is displayed in Sitecore Intranet Portal front-end editor while rendering edit control for a field of type 'internal link'. The message will be rendered only if the field refers to non-existing item.

Front-end view:



Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.4.6 Frontend upload limit (frontendeditingfilesizelimit)

Type: text

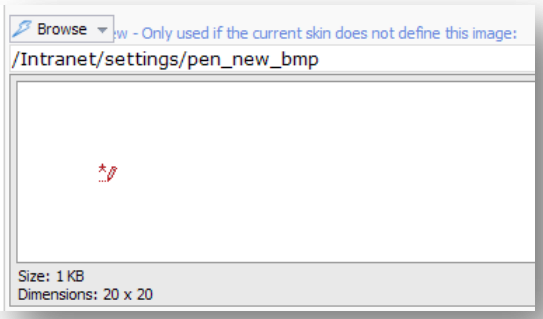
Description: This setting specifies the maximal size of a file (in kilobytes) which can be uploaded to Sitecore Intranet Portal site using the Intranet Upload tool. If the value of the setting can't be parsed as integer or it is less than 1 then default value (50000000) is used.

1.4.7 Icon: Add new (frontendeditingiconaddnew)

Type: image

Description: This setting specifies a link to the image for Add New Item button on Sitecore Intranet Portal site. This button is rendered by the Intranet Main layout and Intranet FAQList rendering (for the items based on the Intranet.FAQSection template). The Add New Item button is rendered only if the user has Create access right to the current item and if the current item has at least one master assigned which is readable for the current user and has an 'Editor' layout assigned. Note that the setting is presented in the main settings item for backward compatibility and it is used only if the setting with the same name from the skin settings item is not set.

Back-end view:



Front-end view:

1.4.8 Icon: Edit (frontendeditingiconedit)

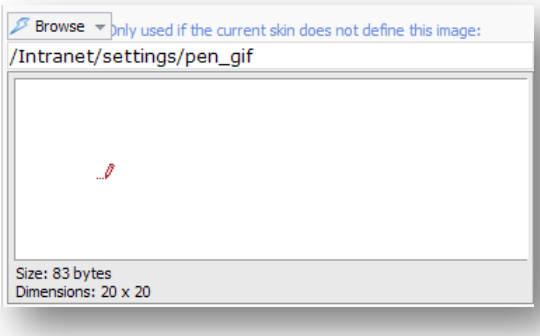
Type: image

Description: This setting specifies a link to the image for Edit Item button on Sitecore Intranet Portal site. The button is rendered by the Intranet Main layout and the Intranet FAQList rendering (for the items based on the Intranet.FAQSection template). The Edit Item button is rendered only if the user has Write access right to the current item and if the current item has the layout assigned to the 'Editor'

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

device of the item. Note that the setting is presented in the main settings item for backward compatibility and it is used only if the setting with same name from the skin settings item is not set. The Search web part has its configuration item which contains the link to the web part configuration file. If in that file '/WebPart/CustomizationLink' node specified then Edit web part button will be rendered while rendering the Search web part.

Back-end view:



Front-end view:

1.4.9 Path to public media folder (frontendeditingsavepath)

Type: text

Description: This setting specifies the path to an item under which all media items will be stored. This setting is used by the 'Intranet Upload' tool.

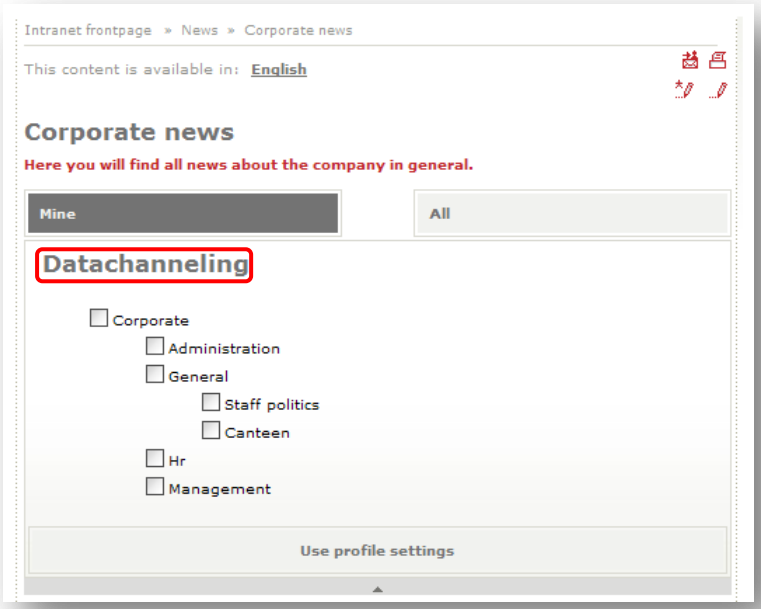
1.4.10 Header, datachanneling (frontendeditingdatachanneltext)

Type: text

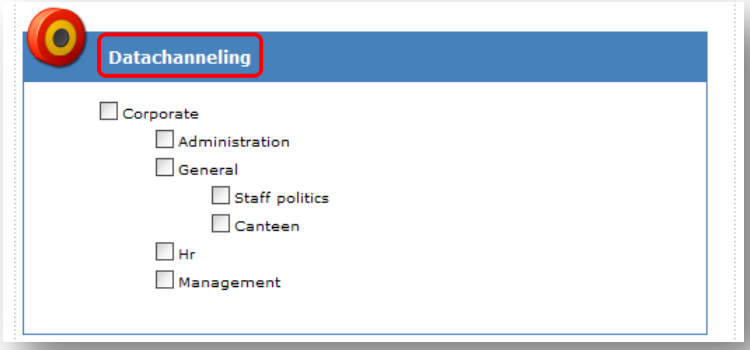
Description: This setting specifies the heading of the Datachanneling control. This setting is used by the Intranet DataChannelControl sublayout (it is used to render items based on the Intranet.NewsArchive and Intranet.NewsSection templates) and by Sitecore Intranet Portal front-end editor if the user is editing his/her own profile.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Front-end view (Intranet DataChannelControl sublayout):



Front-end view (user is editing his/her own profile):



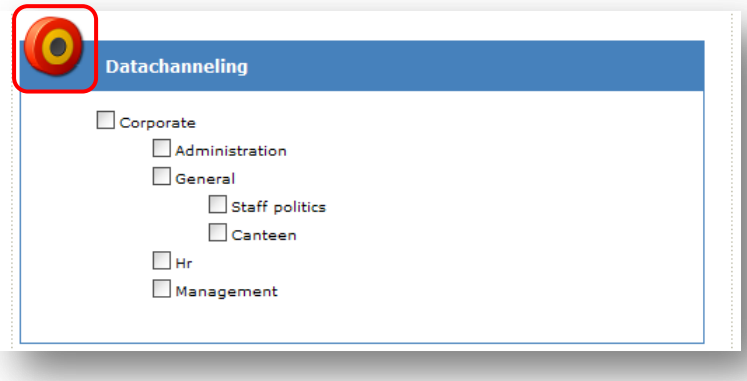
1.4.11 Icon, datachanneling (frontendeditingdatachannelicon)

Type: icon

Description: This setting specifies the path to an icon that is rendered at the top of the data channeling section in Sitecore Intranet Portal front-end editor.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Front-end view:



1.4.12 Auto versioning enabled for (AutoVersioningEnabledFor)

Type: tree list

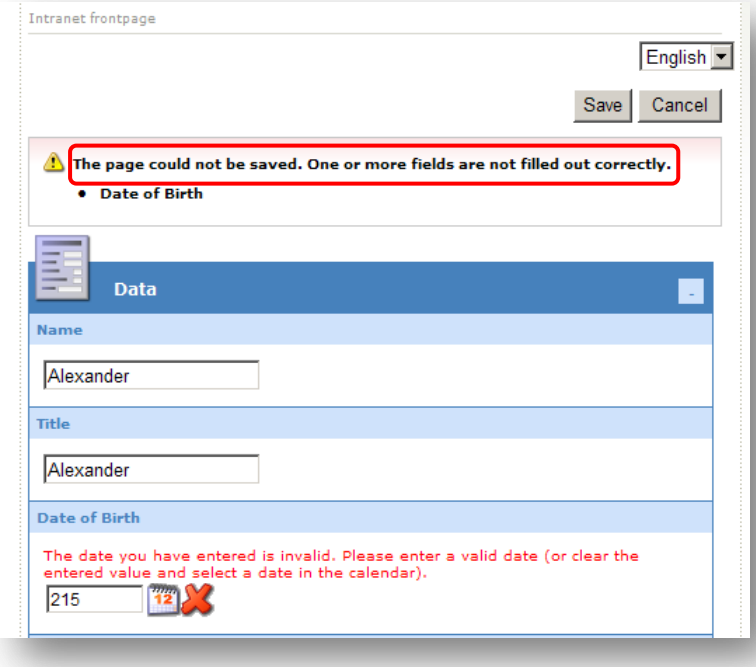
Description: If a user saves an item based on one of the templates specified in this setting using either SIP front-end editor or Page Editor then a new version of the item is created and all changes are saved to this new item version.

1.4.13 Message: validation error (frontendeditingValidationError)

Type: text

Description: This setting specifies the text of a message that is rendered on Sitecore Intranet Portal front-end editor if one or more fields are not filled out properly. The message is rendered after the user tries to save the current item.

Front-end view:



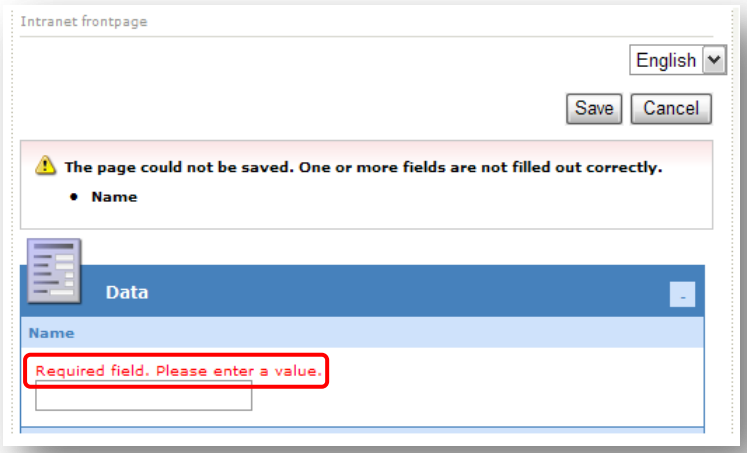
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.4.14 Message: Required field error (frontendeditingRequiredFieldMsg)

Type: text

Description: This setting specifies the text of a message that is rendered on Sitecore Intranet Portal front-end editor near the field that is marked as 'required' but does not meet validation rules. The message is rendered after the user tries to save the current item.

Front-end view:

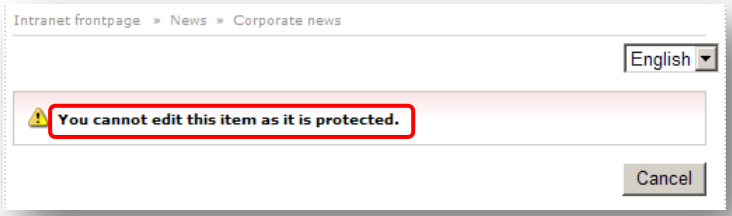


1.4.15 Error: Protected item (frontendeditingErrorProtectedItem)

Type: text

Description: This setting specifies the text of a message that is rendered on Sitecore Intranet Portal front-end editor if the current item is marked as 'protected' using Sitecore back-end editor.

Front-end view:



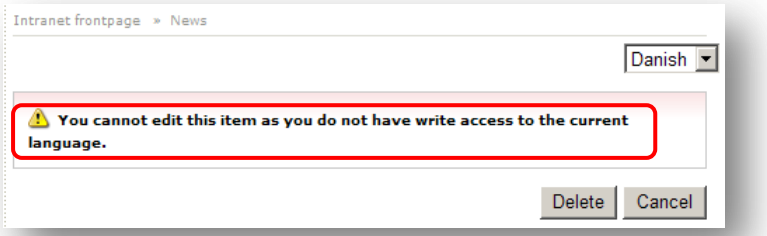
1.4.16 Error: User does not have write access to the current language (frontendeditingErrorAccess)

Type: text

Description: This setting specifies the text of a message that is rendered on Sitecore Intranet Portal front-end editor if the user does not have write access right to the language in which he/she is trying to edit the current item.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Front-end view:



1.4.17 Error: Locked item (frontendeditingErrorItemLocked)

Type: text

Description: This setting specifies the text of a message that is rendered on Sitecore Intranet Portal front-end editor if the current item was locked in Sitecore Content Editor. Note that '{0}' sequence in the setting value will be replaced with the name of the user who has locked the item in Sitecore Content Editor.

Front-end view:

Front-end view:

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.7 News Options

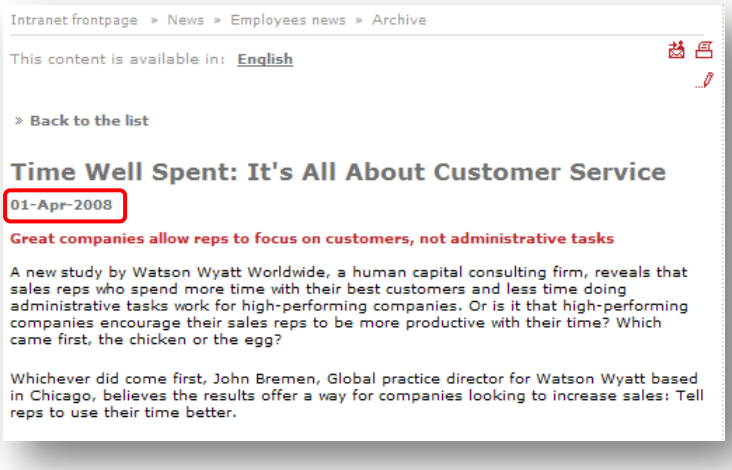
The description of settings located in the News options section of the Main Settings item.

1.7.1 Date Format (newsdateformat)

Type: text

Description: This setting is used to specify a single date format for site news. By default this setting is used while rendering items based on the Intranet.NewsItem template (Intranet NewsItem rendering).

Front-end view:

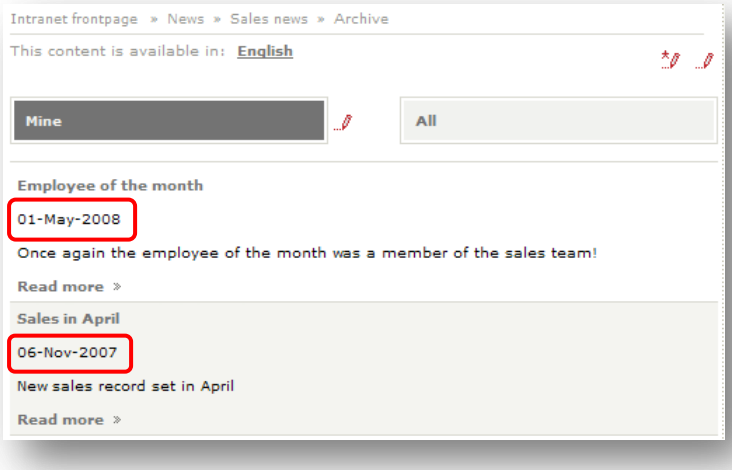


1.7.2 Date format lists (newsdateformatlists)

Type: text

Description: This setting is used to specify a single date format for site news lists. By default this setting is used while rendering items based on the Intranet.NewsSection template (Intranet NewsList rendering) and site news front page (Intranet NewsFrontpage rendering).

Front-end view:



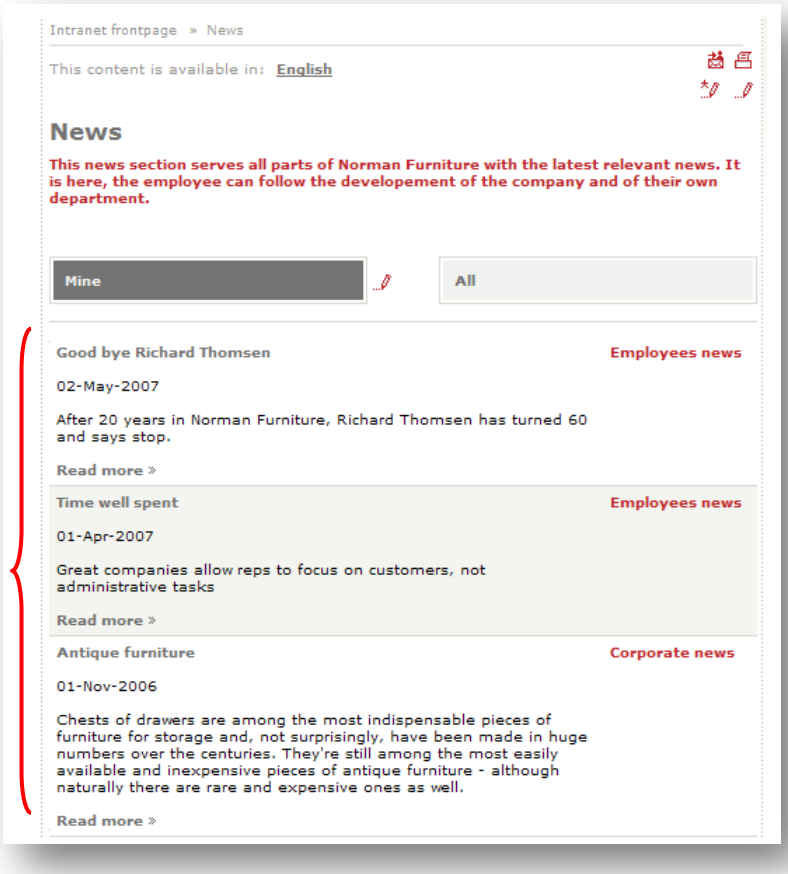
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.7.3 News frontpage: item count (newsfrontpageitemcount)

Type: text

Description: This setting specifies the number of the latest news that are rendered on site news front page (Intranet NewsFrontpage rendering). All other news will not be included in this list.

Front-end view:



Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.8 Author

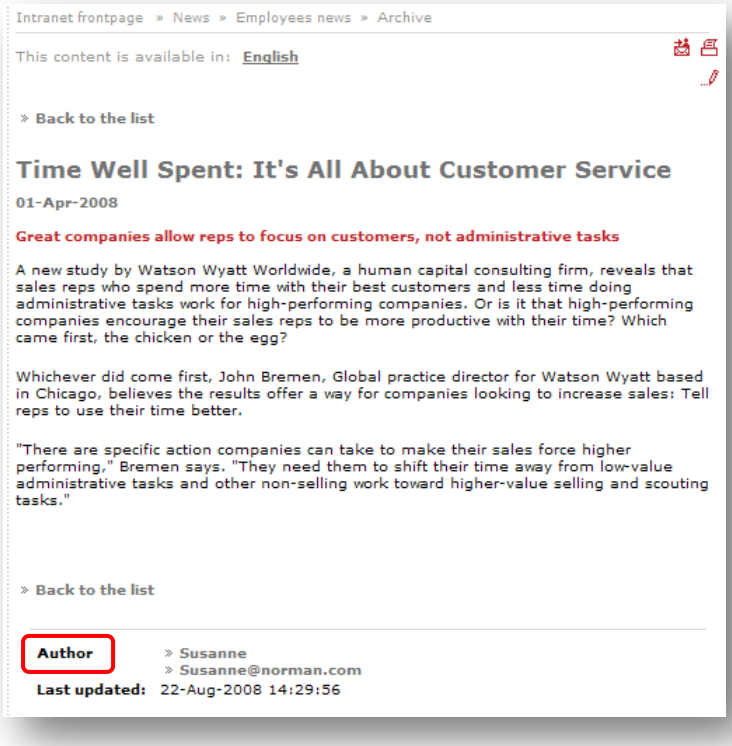
The description of settings located in the Author section of the Main Settings item.

1.8.1 Author (authorauthor)

Type: text

Description: This setting specifies the text which is rendered as the title of article ‘Author’ section. By default this setting affects the Intranet Author rendering which is used by the Intranet Main layout. Note that the title of ‘Author’ section is rendered only if the current data item has the correct value in the ‘authorauthor’ field.

Front-end view:



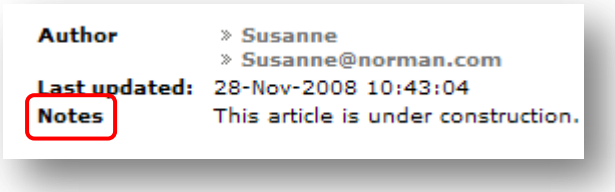
1.8.2 Remarks (authorremarks)

Type: text

Description: This setting specifies the text which is rendered as the title of article ‘Notes’ section. By default this setting affects the Intranet Author rendering which is used by the Intranet Main layout. Note that the title of the ‘Notes’ section is rendered only if the current data item has the correct value in ‘authornotes’ field.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Front-end view:

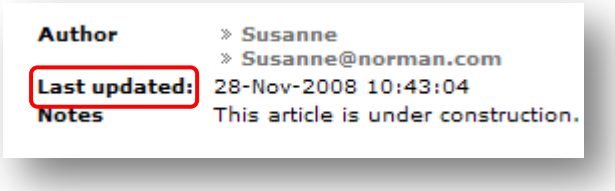


1.8.3 Updated (authorupdated)

Type: text

Description: This setting specifies the text that is rendered as the title of article 'Last updated' section.

Front-end view:

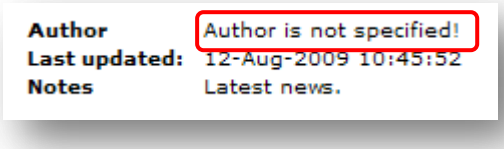


1.8.4 Message: Author is not specified (authorNotSpecified)

Type: text

Description: This setting specifies the text that is rendered as the title of article 'Author' section in the Page Editor mode, when the author is not specified.

Front-end view:



Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.9 List Options

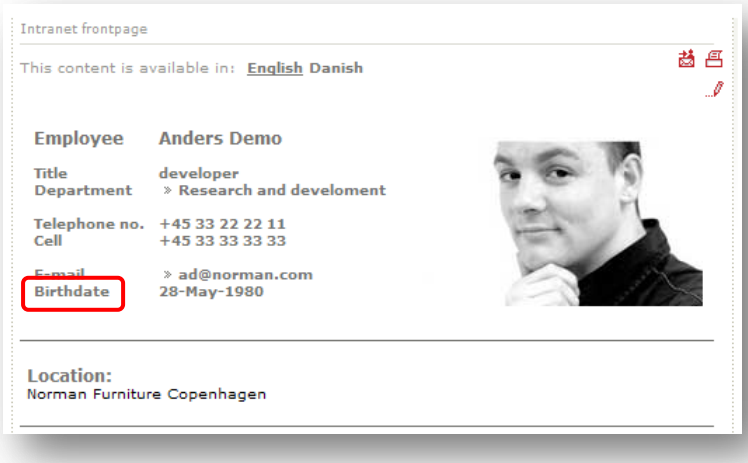
The description of settings located in the List options section of the Main Settings item.

1.9.1 Header, date of birth (dlheaderbirthdate)

Type: text

Description: This setting specifies the text that is rendered as the title of user's profile 'birth date' section. By default this setting affects the Intranet Employee rendering (which is assigned to the Intranet.UserProfile template). Note that the title is rendered only if the current profile has the 'birthdate' field correctly filled in.

Front-end view:



1.9.2 Header, cell phone (dlheadercell)

Type: text

Description: This setting specifies the text that is rendered as the title of user's profile 'cell phone number' section. By default this setting affects the Intranet Employee rendering (which is assigned to the Intranet.UserProfile template). Note that the title is rendered only if the current profile has the 'cell' field correctly filled in.

1.10 Send Page

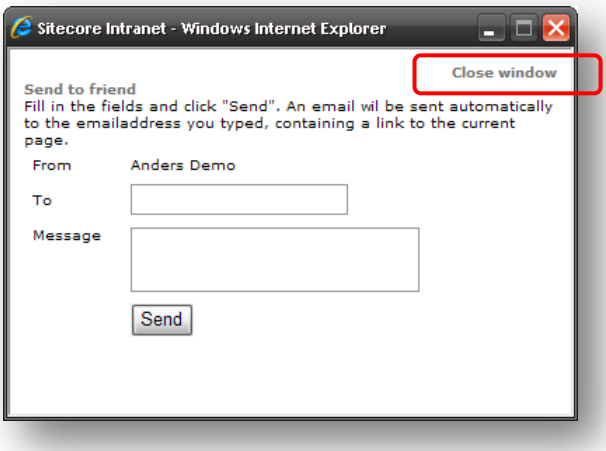
The description of settings located in the Send page section of the Main Settings item.

1.10.1 Close window text (sendpage_closewindowtext)

Type: text

Description: The setting specifies the text that will be used as an inscription for the 'Close window' link. By default this setting affects the behavior of the 'SendPage' layout only.

Front-end view:

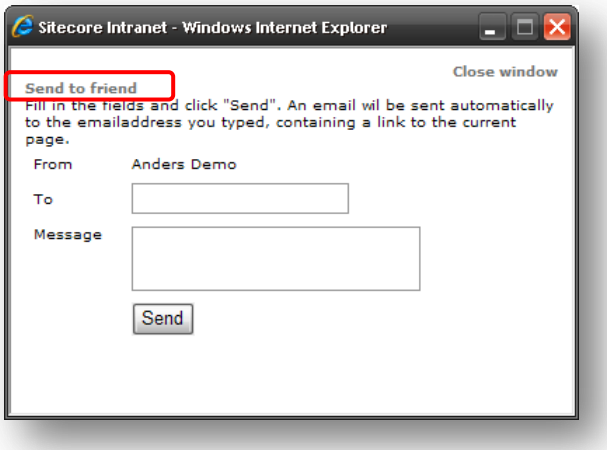


1.10.2 Headline (sendpage_headline)

Type: text

Description: The setting specifies the text that will be used as a title of the 'send page' service. By default this setting affects the behavior of the 'SendPage' layout only.

Front-end view:



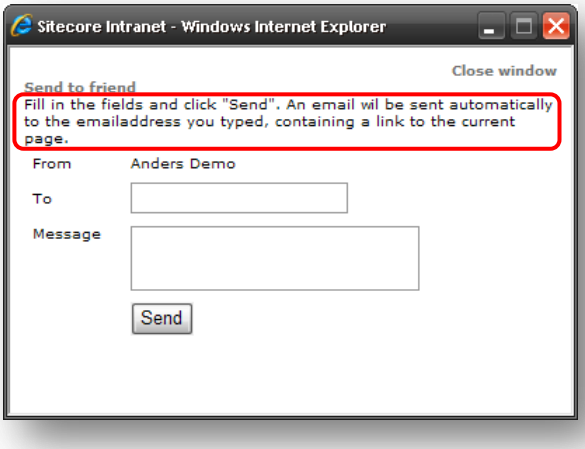
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.10.3 Body (sendpage_body)

Type: rich text

Description: The setting specifies the text that will be used as the description of the 'send page' service. By default this setting affects the behavior of the 'SendPage' layout only.

Front-end view:

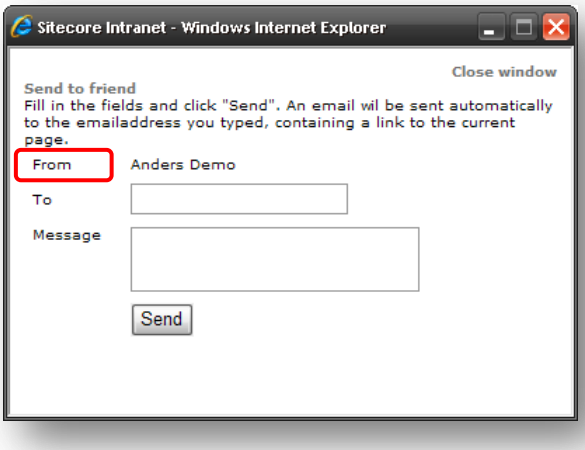


1.10.4 Prefix - from (sendpage_prefixfrom)

Type: text

Description: The setting specifies the text that will be used as the label for the 'from' field of the 'send page' service. By default this setting affects the behavior of the 'SendPage' layout only.

Front-end view:



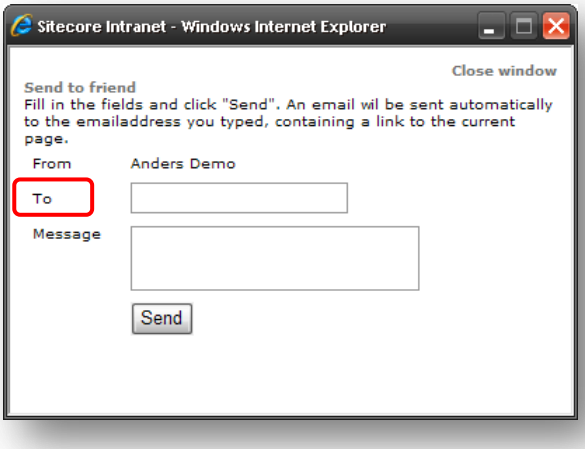
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.10.5 Prefix - to (sendpage_prefixto)

Type: text

Description: The setting specifies the text that will be used as a label for the 'To' field of the 'send page' service. By default this setting affects the behavior of 'the SendPage' layout only.

Front-end view:

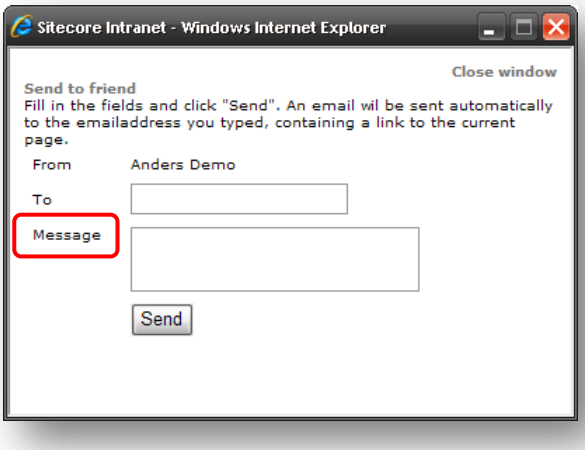


1.10.6 Prefix - message (sendpage_prefixmessage)

Type: text

Description: The setting specifies the text that will be used as a label for the 'message' field of 'the send page' service. By default this setting affects behavior of the 'SendPage' layout only.

Front-end view:



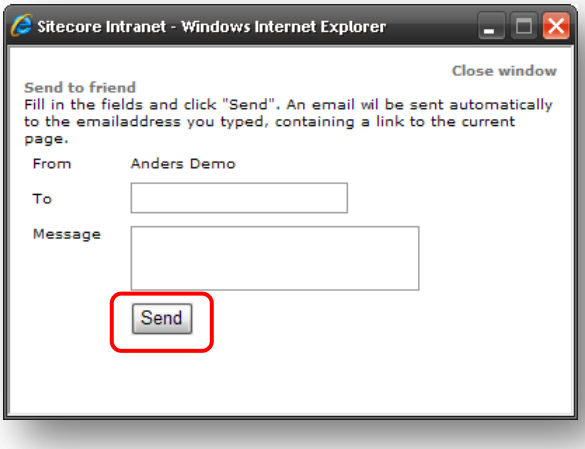
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.10.7 Submit button text (sendpage_submitbuttontext)

Type: text

Description: The setting specifies the inscription for the ‘send’ button of the ‘send page’ service. By default this setting affects behavior of the ‘SendPage’ layout only.

Front-end view:

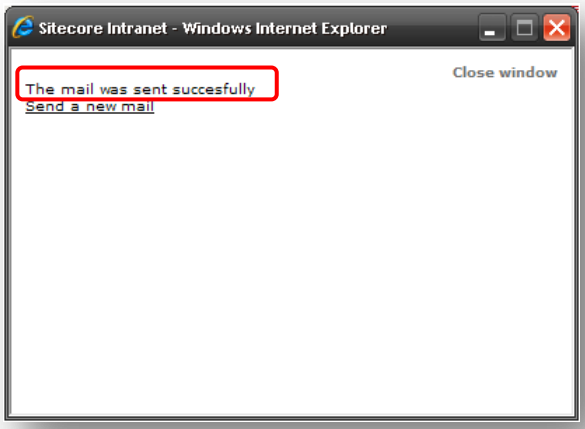


1.10.8 Body - sent (sendpage_bodysent)

Type: rich text

Description: The setting specifies the text that will be used as a message on the ‘send page’ service if a message was sent successfully. By default this setting affects behavior of the ‘SendPage’ layout only.

Front-end view:



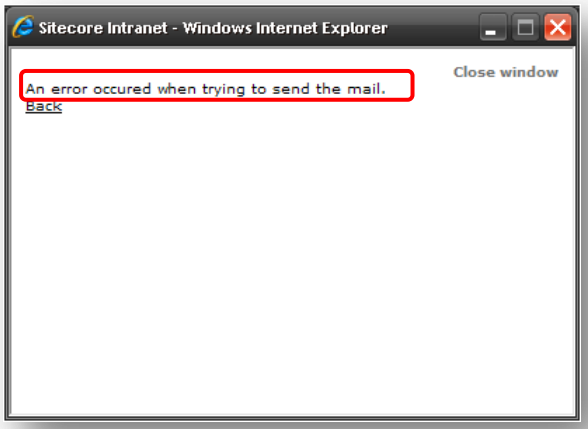
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.10.9 Body - error sending e-mail (sendpage_errortext)

Type: rich text

Description: The setting specifies the text that will be used as a message on the 'send page' service if a message was not sent successfully. By default this setting affects behavior of the 'SendPage' layout only.

Front-end view:

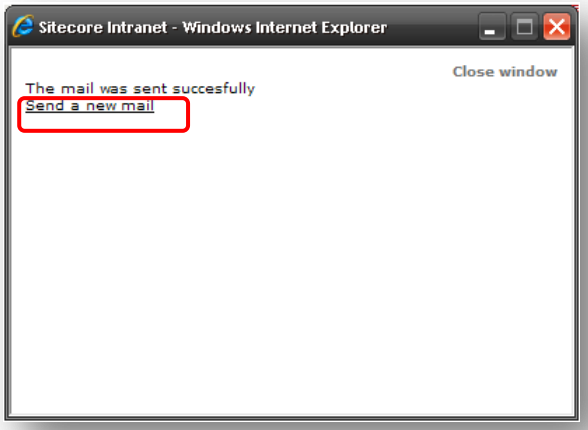


1.10.10 Send new link text (sendpage_sendnewlinktext)

Type: text

Description: The setting specifies the text that will be used as an inscription for the 'send new mail' link if a message was sent successfully. By default this setting affects behavior of the 'SendPage' layout only.

Front-end view:



1.10.11 SMTP server (sendpage_smtpserver)

Type: text

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Description: The setting specifies the name of the SMTP server that will be used by the 'send page' service to send a message. This setting affects the site blog's 'vacation signup' service and the 'send page' service.

1.10.12 Mail body html (sendpage_mailbodyhtml)

Type: rich text

Description: The setting specifies a template for the HTML mail message which will be sent by the 'send page' service.

You can put the '$...$' markers and they will be replaced with specific values. See the list of possible markers and corresponding substitutions in the table below.

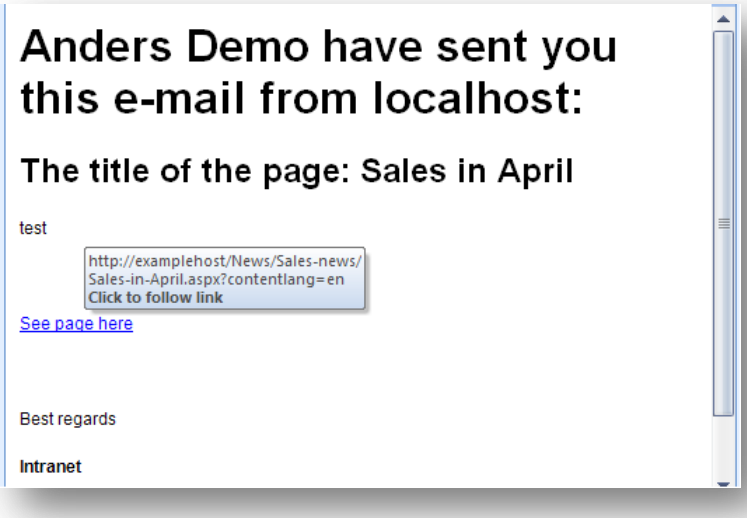
Marker	Substitution
$formfrom$	The name of a user who sends the letter.
$hostname$	The hostname of the current site.
$title$	The value of the 'title' field of the item that represents the page where the 'Send Page' service was triggered.
$formmessage$	The text a user typed in the 'message' field of the 'send page' service page.
$link$	A link to the item which represents the page where the 'Send Page' service was triggered. The text of the link is the value of the 'sendpage_maillinktext' field of the Main Settings item.
$form<controlID>$	The value of the control with "<controlID>" id on the 'send page' service page. For example: on the 'send page' service page there is the following control: `<asp:TextBox ID="toAddress" runat="server"></asp:TextBox>` It represents the 'To' field of the 'send page' service. If you put a '$formtoAddress$' string in this setting's value then it will be replaced with a value that a user entered in the 'To' field of the 'send page' service.

Note
If the value of the 'sendpage_mailbodyhtml' field is not empty the mail body will have an HTML part. If the value of the 'sendpage_mailbodytext' field is not empty the mail body will have a plain text part as well. Usually, your mail client will display e-mail in html format and it will display e-mail in text format if the e-mail was sent in text format only.

Sample back-end field view:

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Sample view of a message sent:



1.10.13 Mail body text (sendpage_mailbodytext)

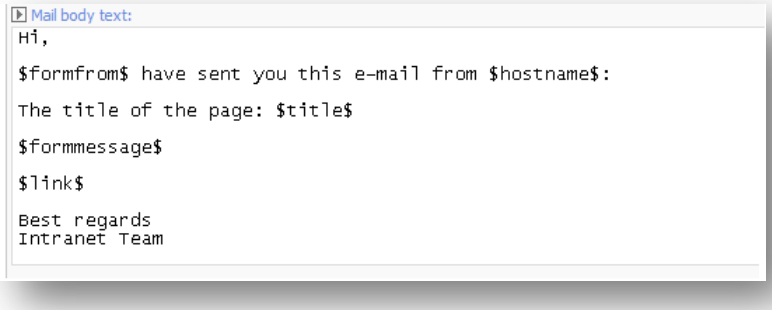
Type: memo

Description: The setting specifies a template for the text mail message that will be sent by the 'send page' service.

You can specify the '$...$' markers and they will be replaced with specific values. See the list of possible markers and the corresponding substitutions in the description of the 'sendpage_mailbodyhtml' setting above.

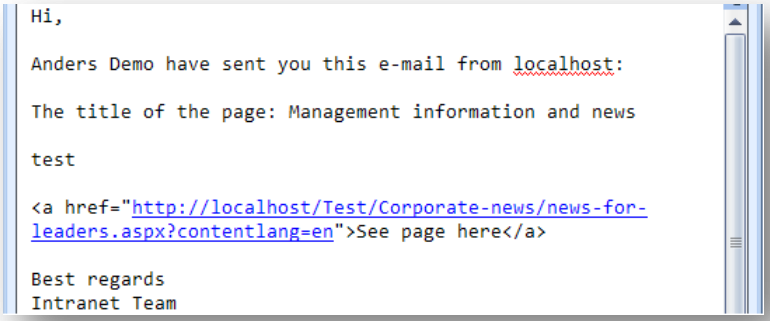
Note
If the value of 'sendpage_mailbodyhtml' field is not empty the mail body will have html part. If the value of 'sendpage_mailbodytext' field is not empty the mail body will have plain text part as well. Usually your mail client will display e-mail in html format and it will display e-mail in text format if the e-mail was sent in text format only.

Sample back-end field view:



Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Sample view of a message sent:



1.10.14 Mail link text (sendpage_maillinktext)

Type: text

Description: The setting specifies a text for the link to a page that will be included into a letter sent by the 'send page' service. The text will be used as an inscription for the link which will be inserted instead of the '$link$' marker of the mail template (see description of the 'sendpage_mailbodyhtml' and the 'sendpage_mailbodytext' fields).

1.10.15 Mail sender address (sendpage_mailsenderaddress)

Type: text

Description: The setting specifies address of an e-mail sender. This setting is used by the 'send page' service and the 'vacation house' service (if an item for the vacation house does not have a value specified in the 'mailsenderaddress' field).

1.10.16 Mail sender name (sendpage_mailsendername)

Type: text

Description: The setting specifies address name of an e-mail sender. This setting is used by the 'send page' service and the 'vacation house' service (if an item for the vacation house does not have a value specified in the 'mailsendername' field).

1.10.17 Mail subject (sendpage_mailsubject)

Type: text

Description: The setting specifies the subject of an e-mail. This setting is used by the 'send page' service only.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.11 Forum

The description of settings located in the Forum section of the Main Settings item.

1.11.1 Answers text (forumanswers)

Type: text

Description: The setting specifies a title for the ‘answers count’ column of the forum entries table.

Front-end view:

1.11.2 Author text (forumauthor)

Type: text

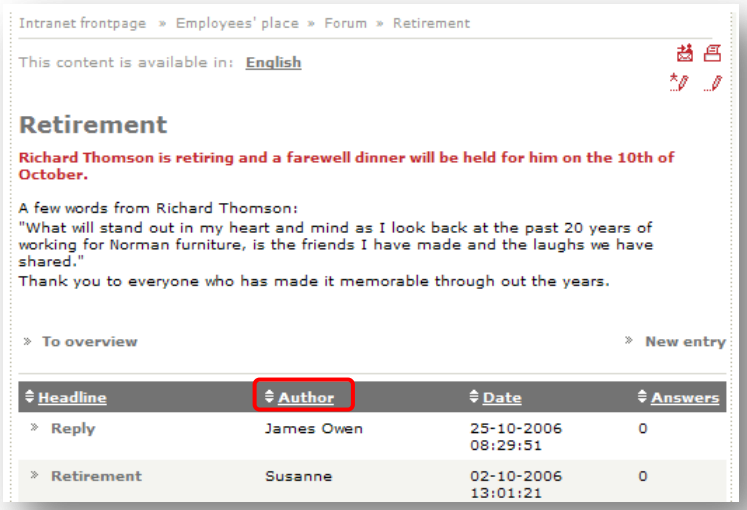
Description: The setting specifies:

1. a title for the ‘author’ column of the forum entries table (‘Intranet Forum’ sublayout assigned to ‘Intranet.Forum’ template)
2. and a title for the ‘author’ information of forum items (‘Intranet Forum’ rendering assigned to ‘Intranet.ForumItem’ template)

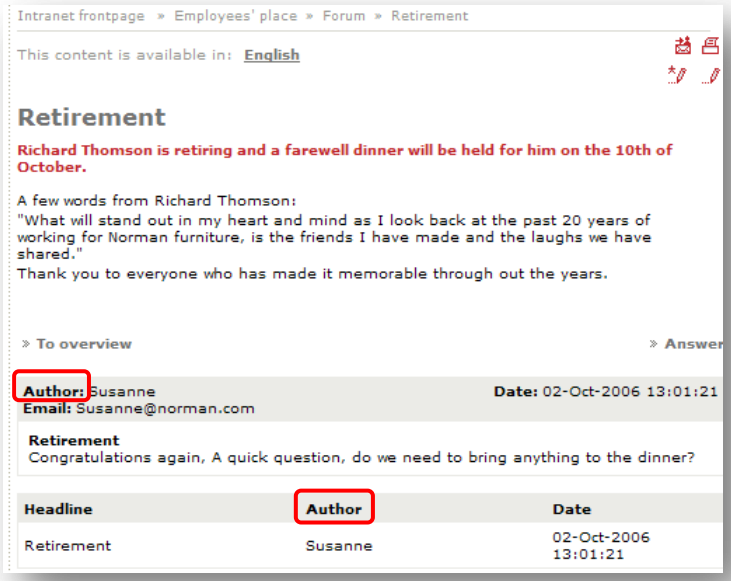
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Front-end view:

1. a title for the ‘author’ column of the forum entries table



2. a title for the ‘author’ information of forum items



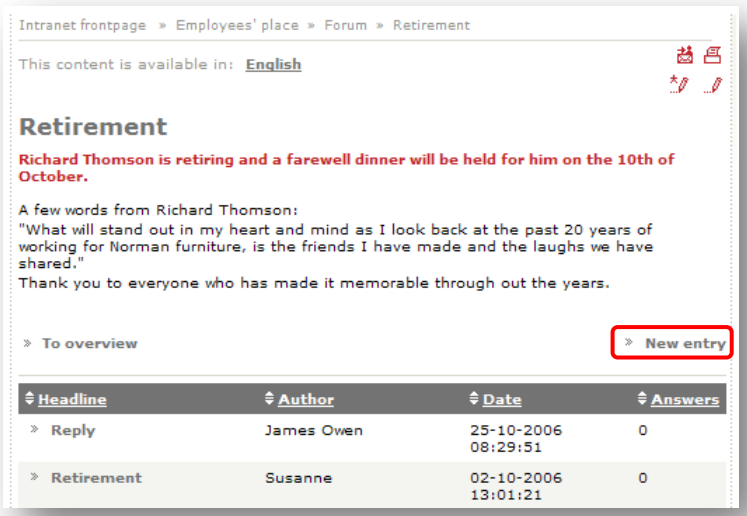
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.11.3 Button - new debate text (forumbuttonnewdebate)

Type: text

Description: The setting specifies an inscription for the ‘add new blog item’ link. The link is rendered by the ‘Intranet Forum’ sublayout (assigned to the ‘Intranet.Forum’ template).

Front-end view:

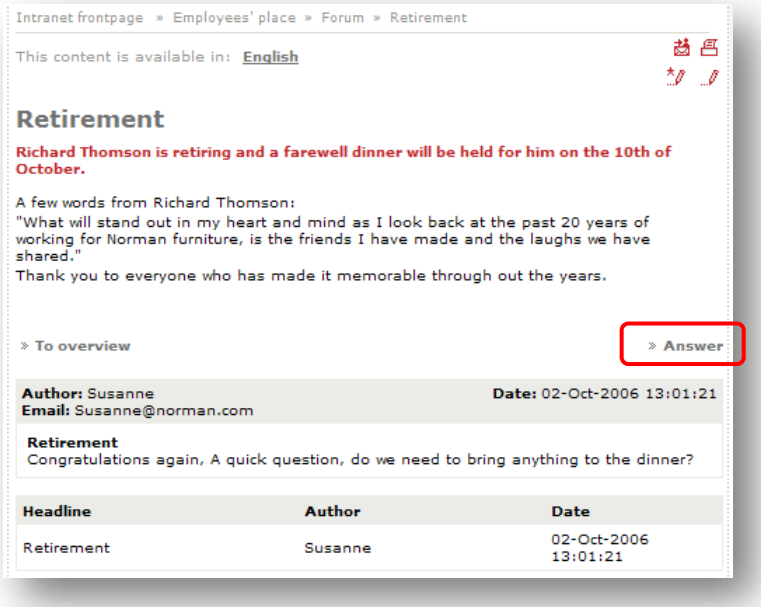


1.11.4 Button - reply text (forumbuttonreply)

Type: text

Description: The setting specifies an inscription for the ‘reply on forum entry’ link. The link is rendered by the ‘Intranet Forum’ rendering (assigned to the ‘Intranet.ForumItem’ template).

Front-end view:



Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.11.5 Button - to overview text (forumbuttontooverview)

Type: text

Description: The setting specifies:

1) an inscription for the ‘back to overview’ link on the forum page (the ‘Intranet Forum’ sublayout assigned to the ‘Intranet.Forum’ template)
2) on the forum item page (the ‘Intranet Forum’ rendering assigned to the ‘Intranet.ForumItem’ template)

Front-end view:

An inscription for the ‘back to overview’ link on the forum page

1.11.6 Created text (forumcreated)

Type: text

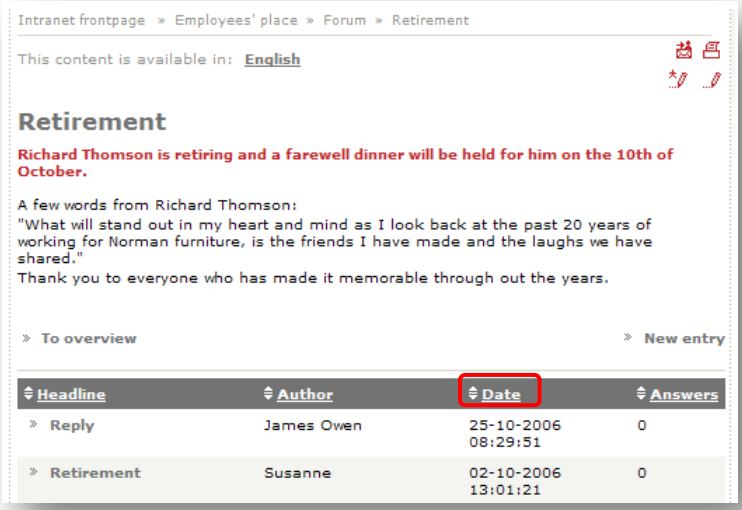
Description: The setting specifies:

1) a title for the ‘date’ column of the forum entries table (the ‘Intranet Forum’ sublayout assigned to the ‘Intranet.Forum’ template)
2) a title for the ‘date’ information of forum items (the ‘Intranet Forum’ rendering assigned to the ‘Intranet.ForumItem’ template)

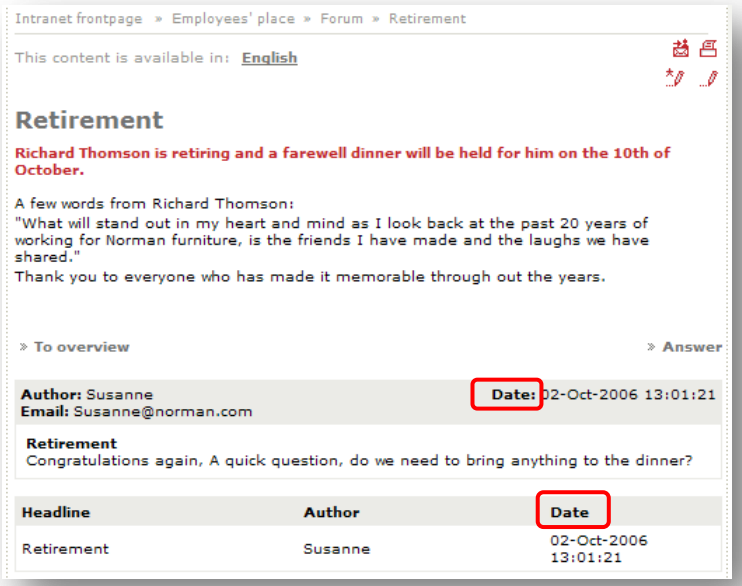
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Front-end view:

1) a title for the ‘date’ column of the forum entries table



2) a title for the ‘date’ information of forum items



1.11.7 Title text (forumtitle)

Type: text

Description: The setting specifies:

1) a title for the ‘forum title’ column of the forum entries table (the ‘Intranet Forum’ sublayout assigned to the ‘Intranet.Forum’ template)
2) a title for the ‘forum title’ information of forum items (the ‘Intranet Forum’ rendering assigned to the ‘Intranet.ForumItem’ template)

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.12 Marketplace

The description of settings located in the Marketplace section of the Main Settings item.

1.12.1 Created by text (MarketPlaceCreated)

Type: text

Description: The setting specifies text for the header of the ‘created by’ information of the tag wall item.

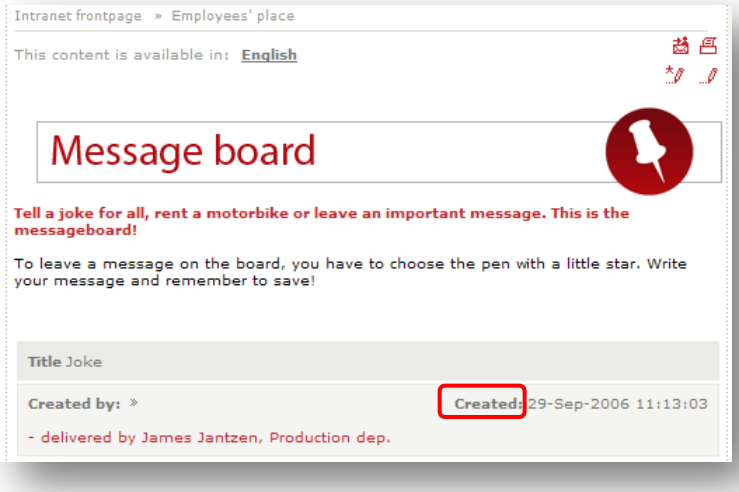
Front-end view:

1.12.2 Created Date text (MarketPlaceCreatedDate)

Type: text

Description: The setting specifies text for the header of the ‘created date’ information of the tag wall item.

Front-end view:



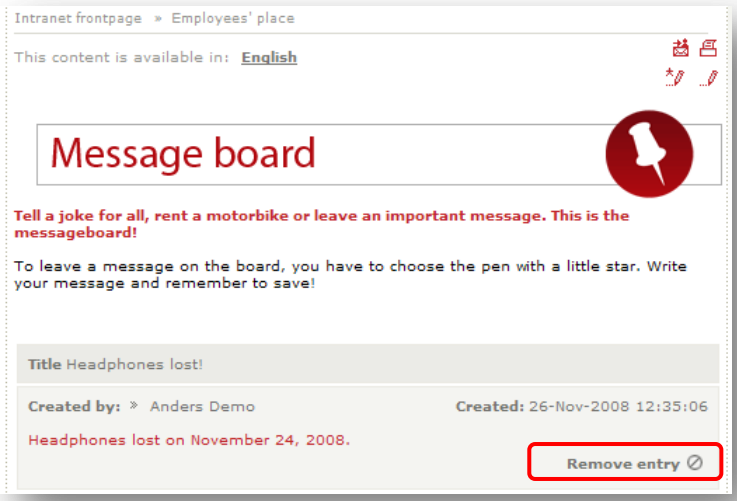
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.12.3 Delete text (MarketPlaceDelete)

Type: text

Description: The setting specifies inscription for the ‘delete entry’ link for the tag wall (message board) item. Note that the link will be rendered for a message on the message board only if it has been created by the current user.

Front-end view:

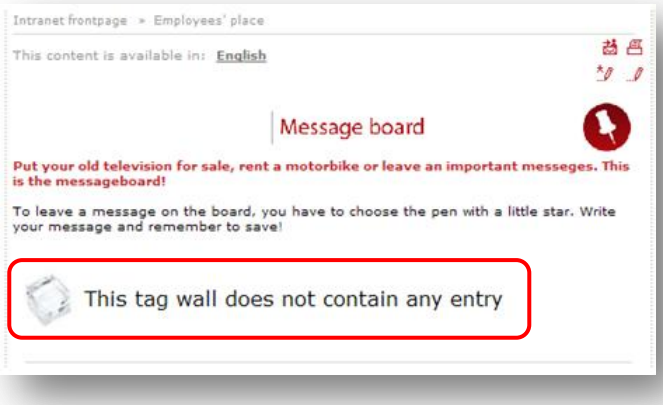


1.12.4 MarketPlaceNoResultsText

Type: rich text

Description: The setting specifies content which will be rendered by the ‘Intranet Tagwall’ sublayout (assigned to the ‘Intranet.Tagwall’ template) if the current tag wall (message board) does not contain any entry.

Front-end view:



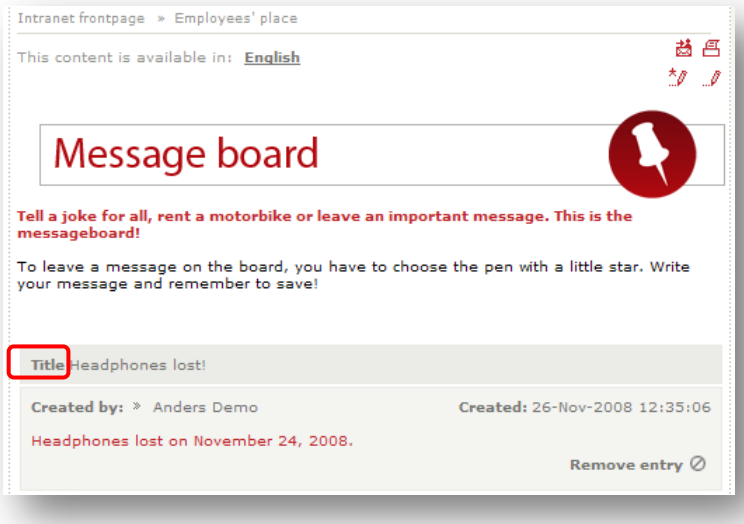
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.12.5 Title text (MarketPlaceTitle)

Type: text

Description: The setting specifies text for the header of the 'title' information of the message board item.

Front-end view:



Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.13 Vacation Signup

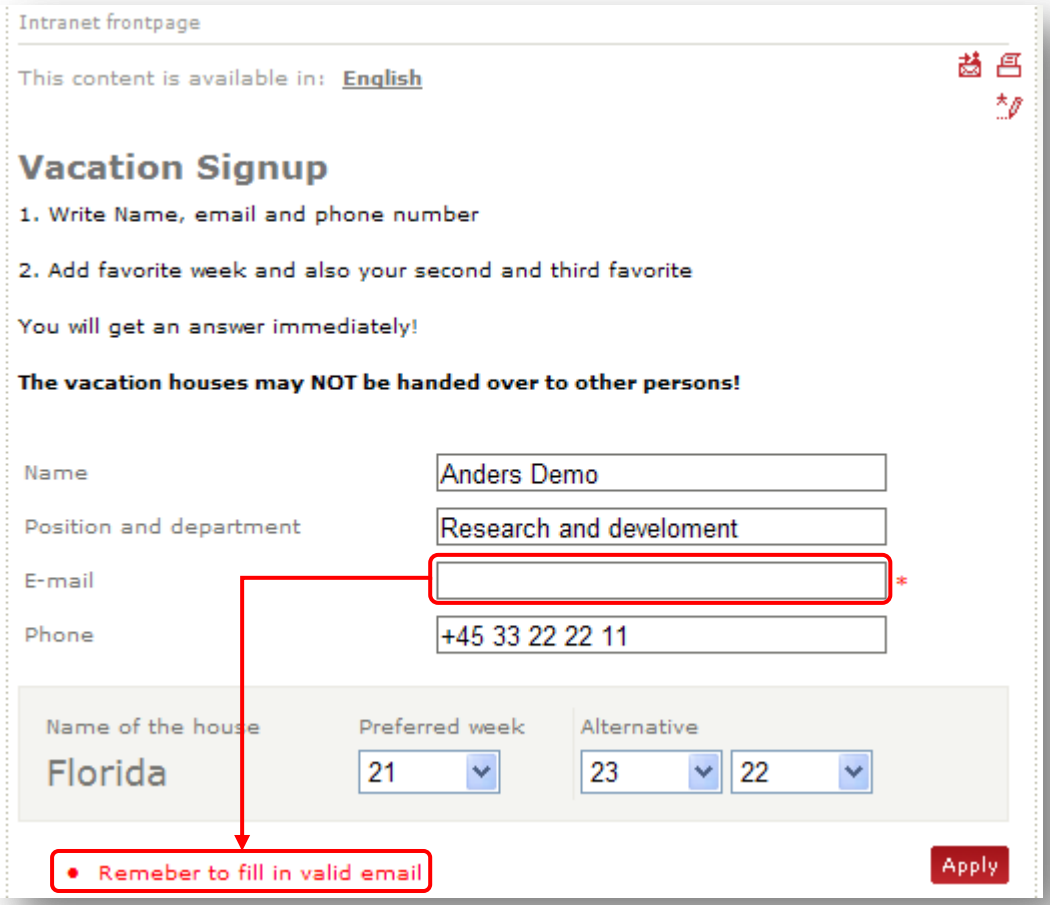
The description of settings located in the Vacation Signup section of the Main Settings item.

1.13.1 ErrorMessageEmail

Type: text

Description: The setting specifies a message for ASP.NET validators which are assigned to the 'e-mail' text box of the 'vacation signup' service form. This setting affects the behavior of the 'Intranet Vacationhouse' sublayout (assigned to the 'Intranet.Vacationhouse' template).

Front-end view:



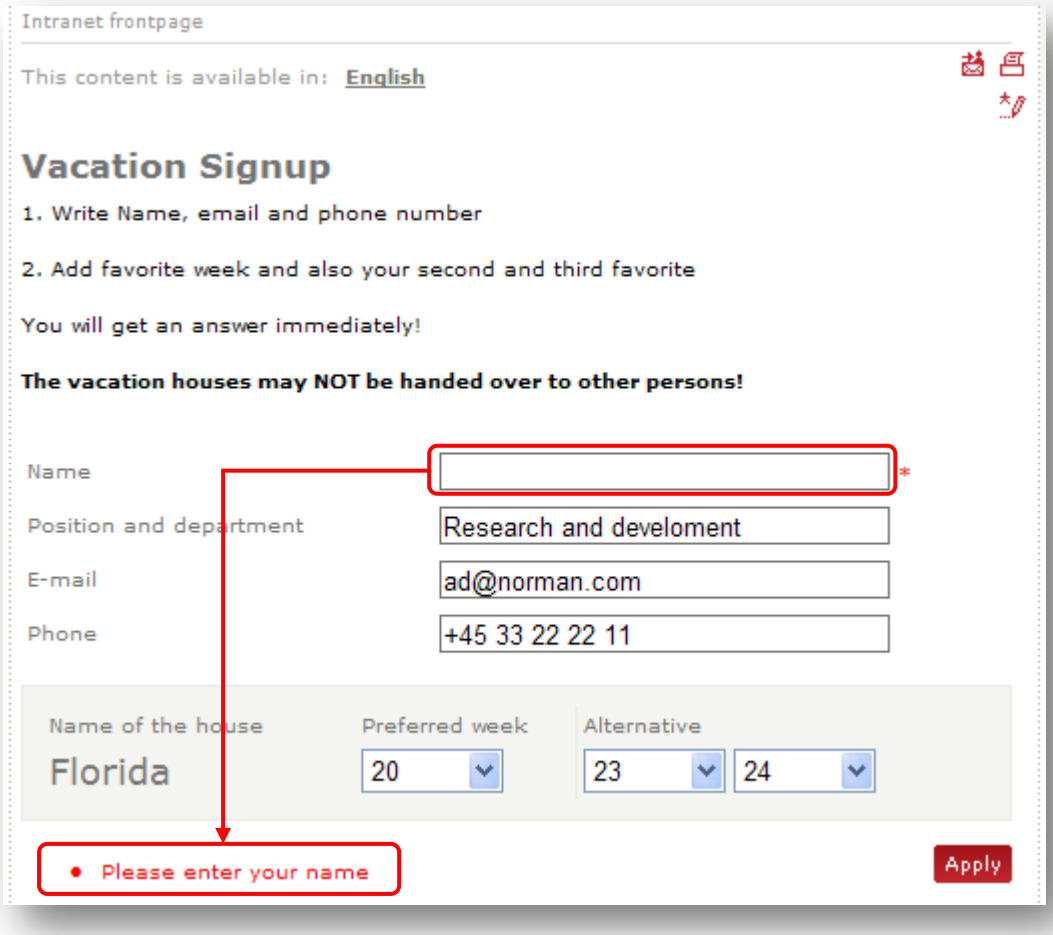
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.13.2 ErrorMessageName

Type: text

Description: The setting specifies a message for ASP.NET validators which are assigned to the 'name' text box of the 'vacation signup' service form. This setting affects the behavior of the 'Intranet Vacationhouse' sublayout (assigned to 'Intranet.Vacationhouse' template).

Front-end view:



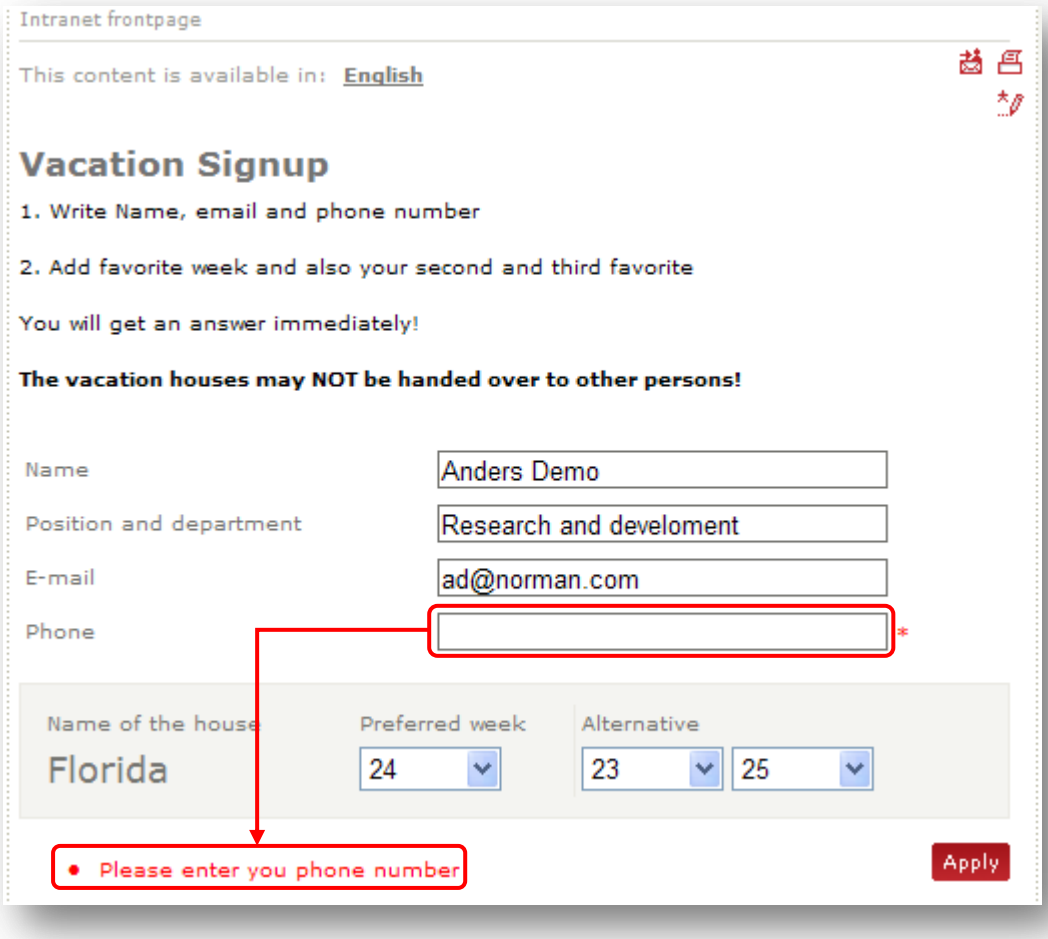
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.13.3 ErrorMessagePhone

Type: text

Description: The setting specifies a message for asp.net validators which are assigned to ‘phone’ text box of ‘vacation signup’ service form. This setting affects behavior of ‘Intranet Vacationhouse’ sublayout (assigned to ‘Intranet.Vacationhouse’ template).

Front-end view:



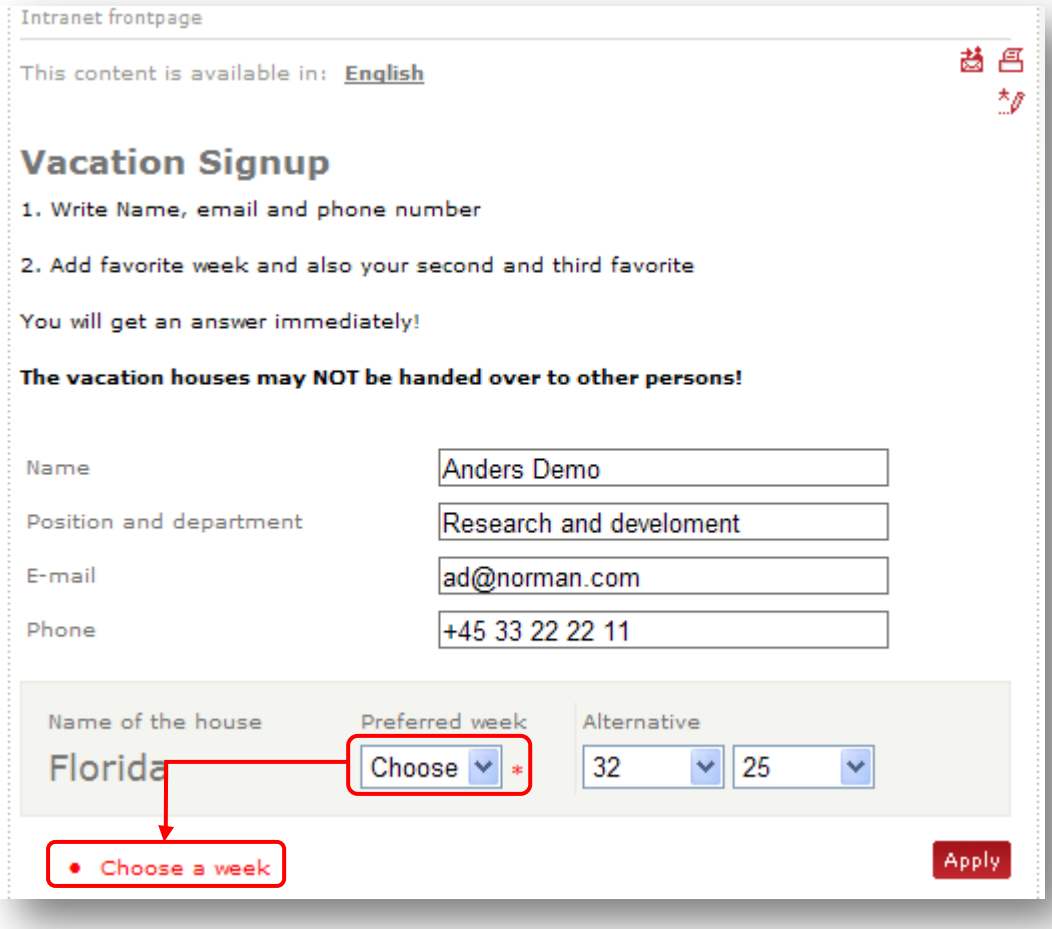
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.13.4 ErrorMessagePreferred

Type: text

Description: The setting specifies a message for ASP.NET validators which are assigned to the 'preferred week' drop down list of the 'vacation signup' service form. This setting affects behavior of the 'Intranet Vacationhouse' sublayout (assigned to the 'Intranet.Vacationhouse' template).

Front-end view:



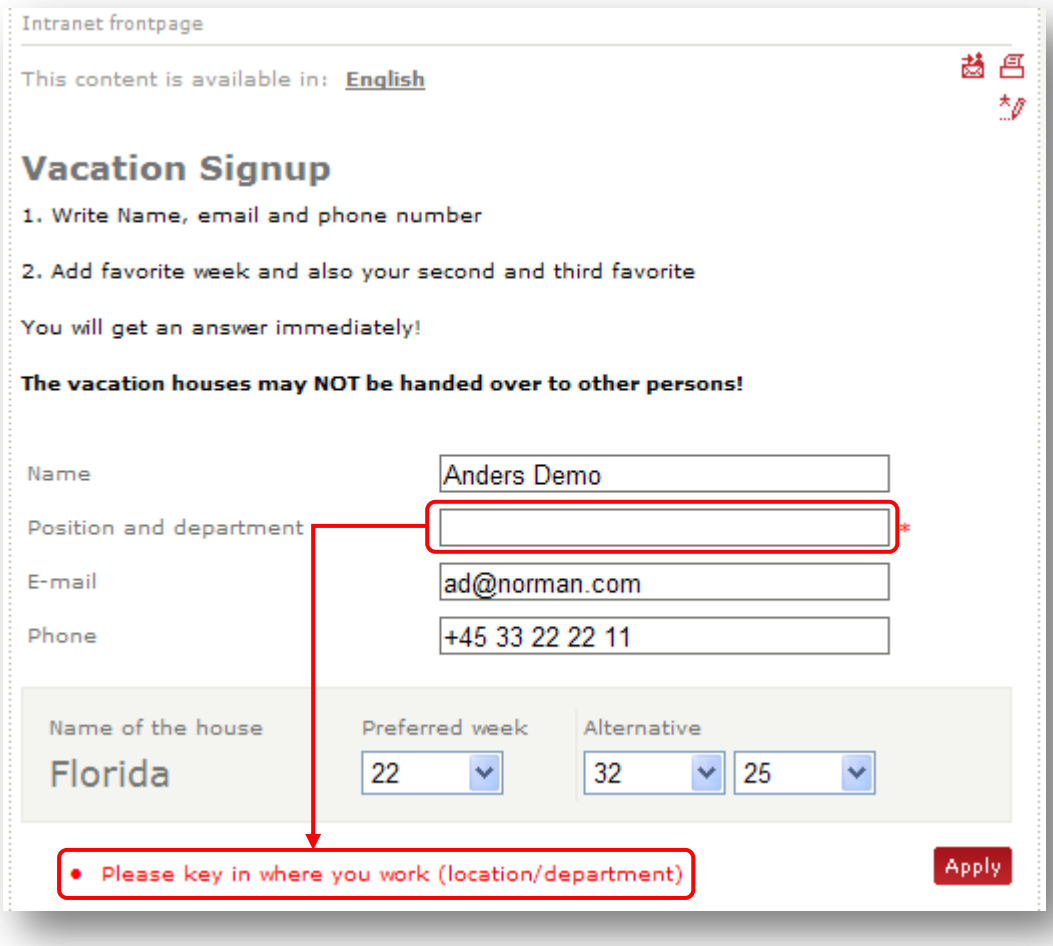
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.13.5 ErrorMessageWorkplace

Type: text

Description: The setting specifies a message for asp.net validators which are assigned to 'position and department' text box of 'vacation signup' service form. This setting affects behavior of 'Intranet Vacationhouse' sublayout (assigned to 'Intranet.Vacationhouse' template).

Front-end view:



Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.14 Activity Search

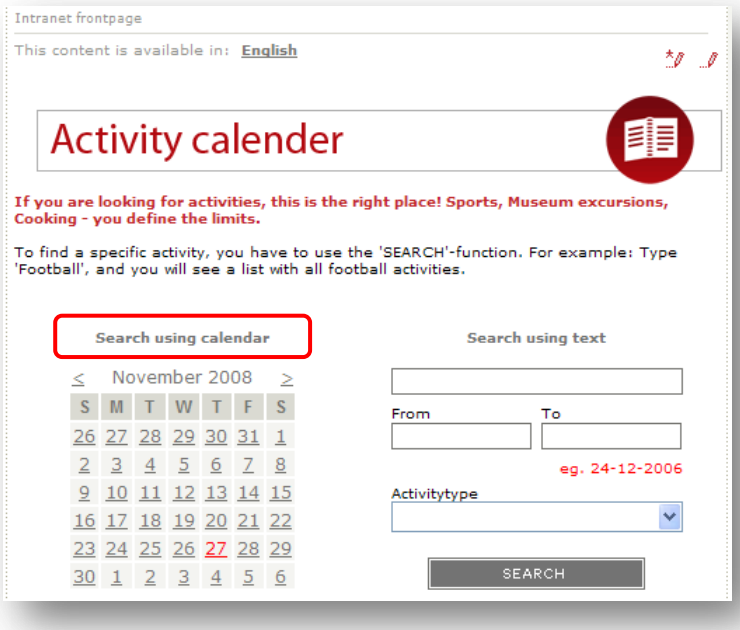
The description of settings located in the Activity search section of the Main Settings item.

1.14.1 ActivitySearchCalendarText

Type: text

Description: The setting specifies text for the ‘search activity calendar’ service which will be rendered as a header above the calendar control.

Front-end view:



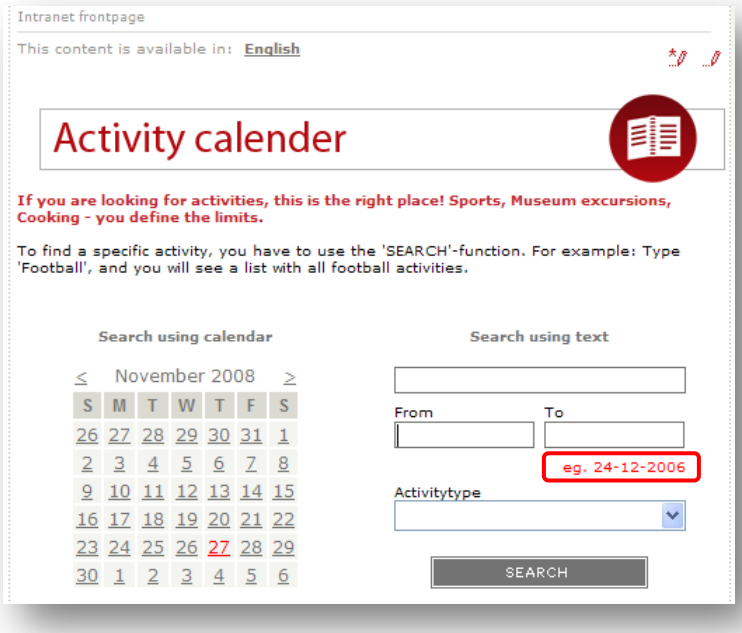
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.14.2 ActivitySearchDateText

Type: text

Description: The setting specifies a sample date which will be rendered on the 'search activity calendar' service form to help user to enter a date in the search form.

Front-end view:



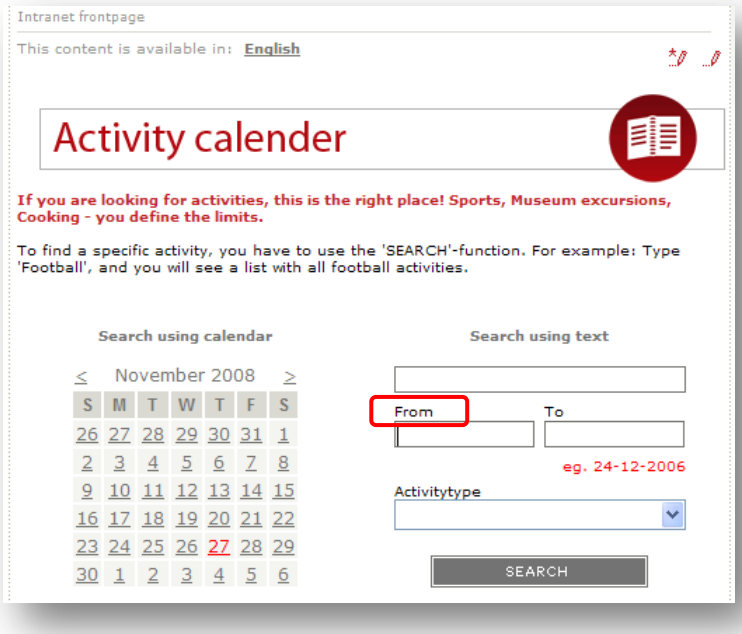
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.14.3 ActivitySearchFromText

Type: text

Description: The setting specifies text for the ‘search activity calendar’ service which will be rendered as a header above the ‘from date’ text box in the group of controls where a user can specify searching activities attributes.

Front-end view:



1.14.4 ActivitySearchNoResultsText

Type: text

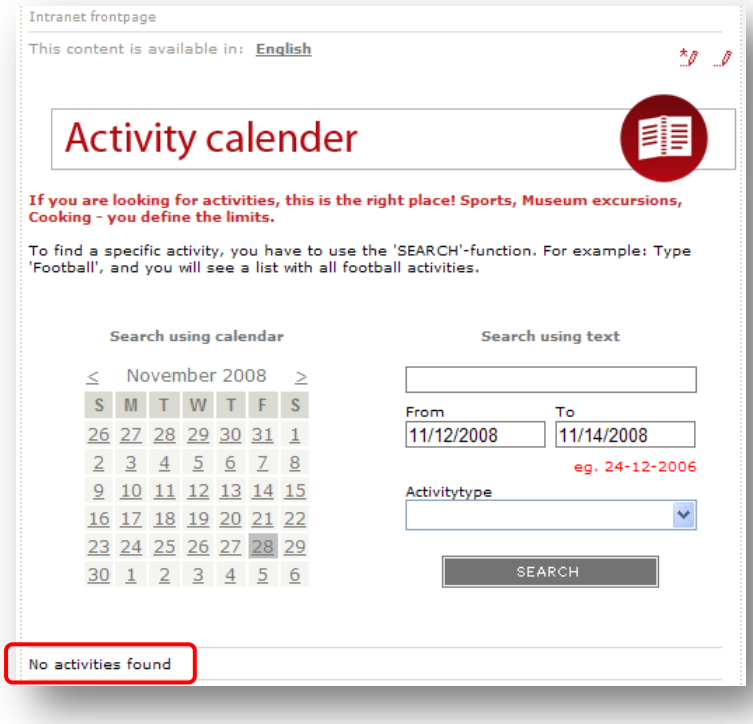
Description: The setting specifies:

1) text which will be rendered on ‘search activity’ service page (‘Intranet ActivitySearch’ sublayout, assigned to ‘Intranet.ActivityCalendar’ template)
2) on ‘activities list’ web part (‘Intranet WebPart Activities’ sublayout) if the last search for activities has no results

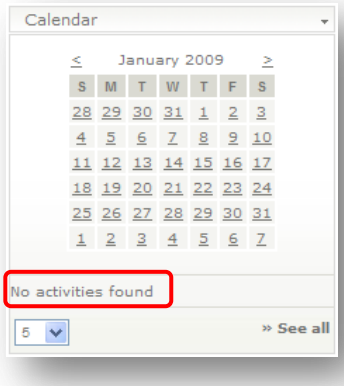
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Front-end view:

1) text which will be rendered on ‘search activity’ service page



2) on ‘activities list’ web part



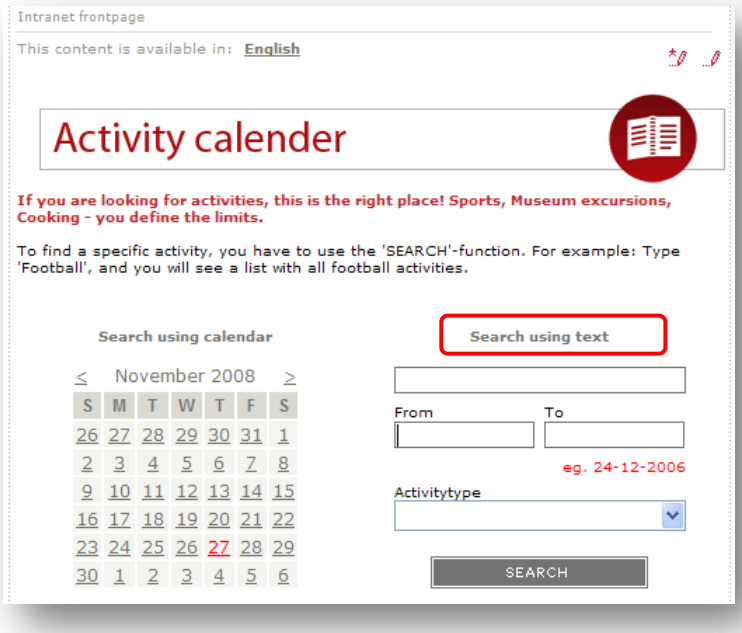
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.14.5 ActivitySearchSearchText

Type: text

Description: The setting specifies text for the ‘search activity calendar’ service which will be rendered as a header above the group of controls where a user can specify attributes of searching activities.

Front-end view:



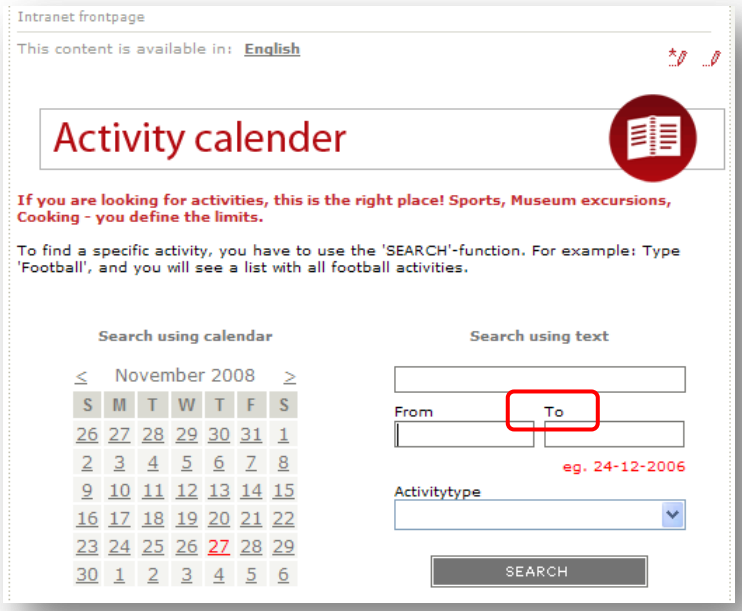
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.14.6 ActivitySearchToText

Type: text

Description: The setting specifies text for the ‘search activity calendar’ service which will be rendered as a header above the ‘to date’ text box in the group of controls where a user can specify attributes of searching activities.

Front-end view:



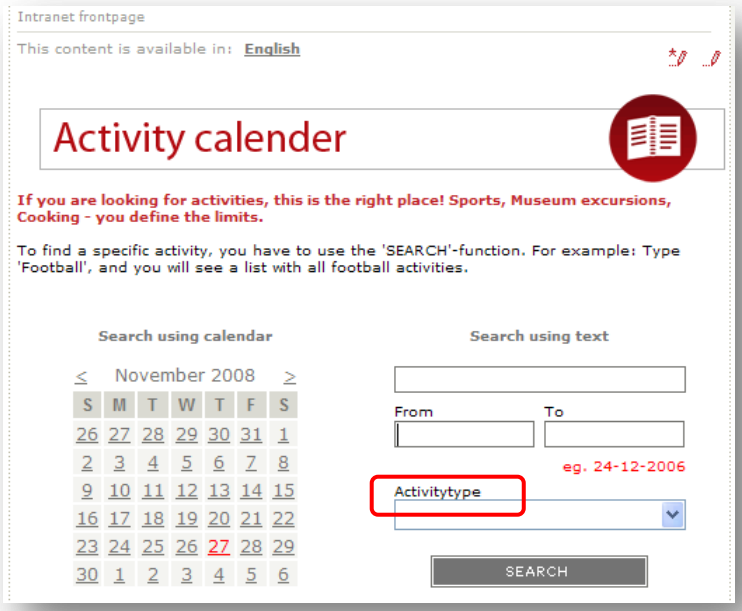
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.14.7 ActivitySearchTypeText

Type: text

Description: The setting specifies text for the ‘search activity calendar’ service which will be rendered as a header above the ‘activity type’ drop down list in the group of controls where a user can specify attributes of searching activities.

Front-end view:



Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.15 Search

The description of settings located in the Search section of the Main Settings item.

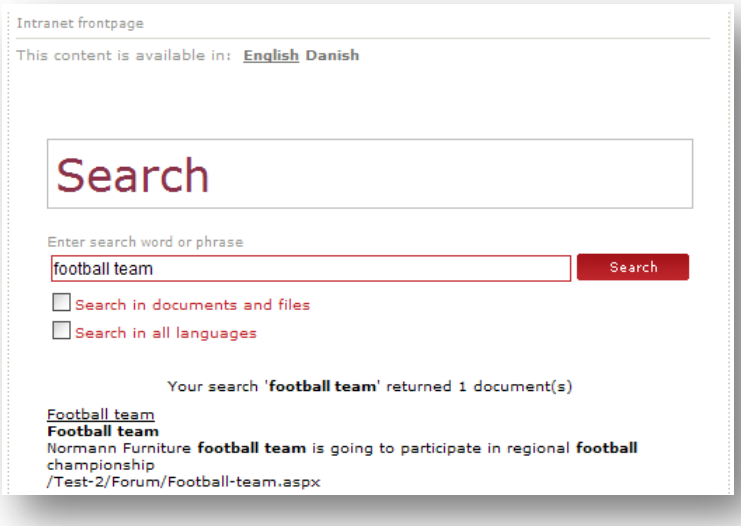
1.15.1 Item Not Found Message

Type: text

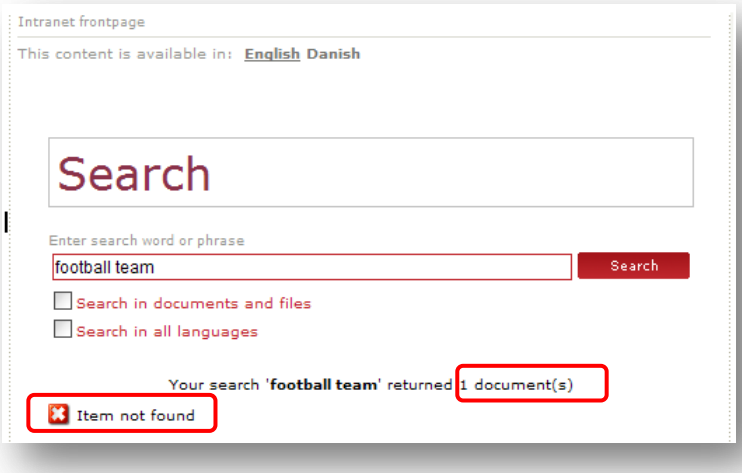
Description: The setting specifies a text which will be rendered by the 'site search' service ('Intranet.Search' sublayout assigned to the 'Intranet.Search' template) in the list of search results if an item was referenced by the search index but was not found in the database.

Front-end view:

1) A user searched 'football team' first.



2) The 'football team' item was deleted. The search yields the 'Item not found message'. Note that since the search index was not rebuilt 1 document is still found.



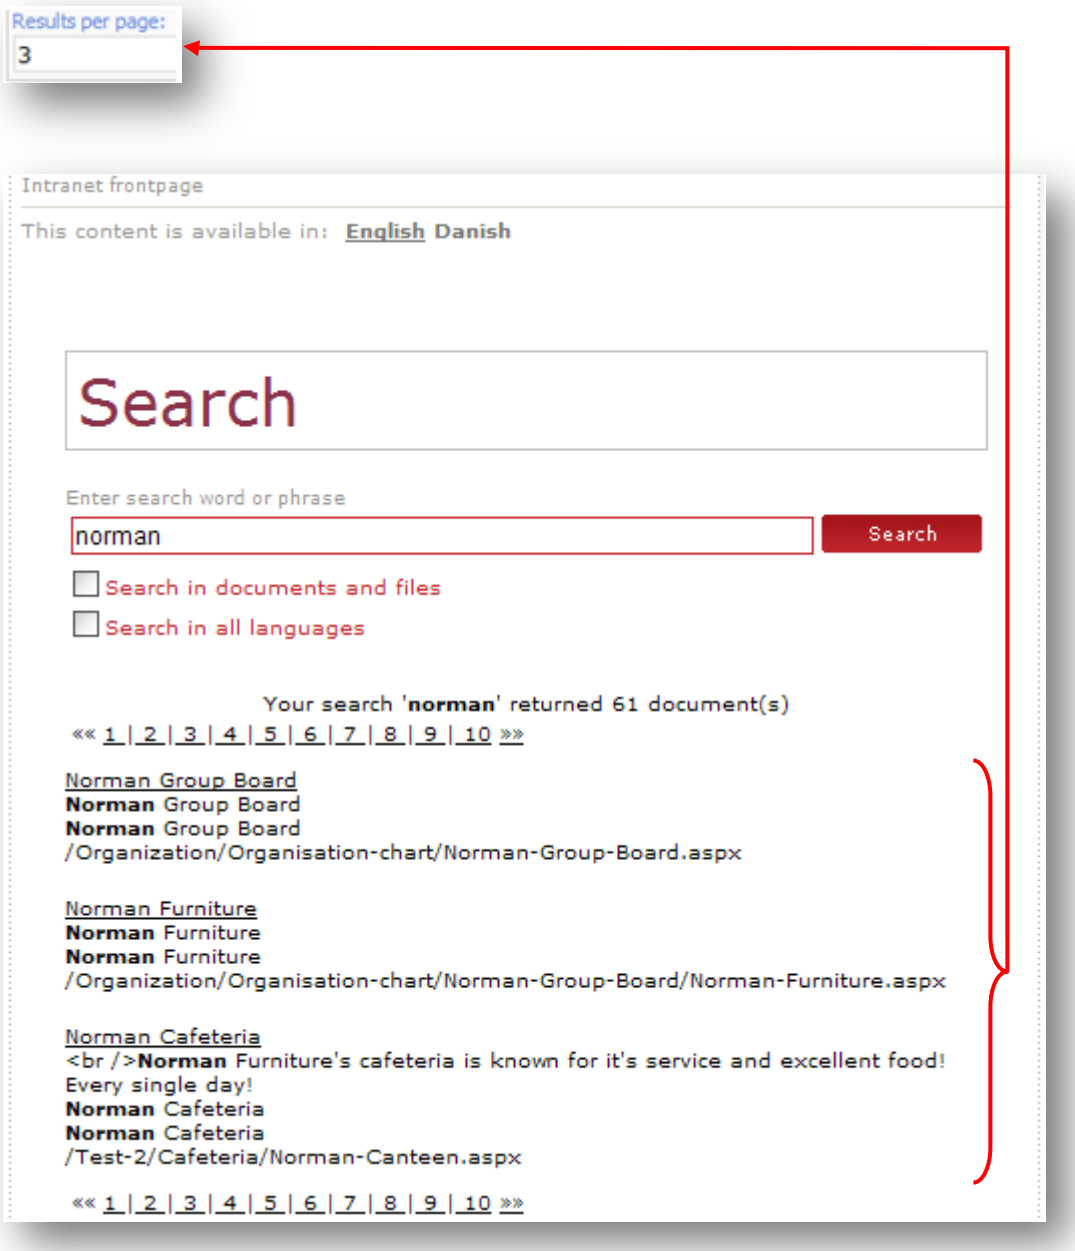
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.15.2 Results per page

Type: text

Description: The setting specifies the number of entries from results of the ‘site search’ service which will be displayed on the page.

Front-end view:



Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.16 Slideshow

The description of settings located in the Slideshow section of the Main Settings item.

1.16.1 SlideshowButtonStartText

Type: text

Description: The setting specifies a text for the ‘slideshow’ service ‘start’ button. The text is used as a tooltip for the ‘start’ image button and as a label for it. This setting affects the ‘Intranet Slideshow’ sublayout (assigned to ‘Intranet.Slideshow’ template).

Front-end view:

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.16.2 SlideshowButtonPauseText

Type: text

Description: The setting specifies a text for the ‘slideshow’ service ‘pause’ button. The text is used as a tooltip for the ‘pause’ image button and as a label for it. This setting affects the ‘Intranet Slideshow’ sublayout (assigned to ‘Intranet.Slideshow’ template).

Front-end view:

1.16.3 SlideshowButtonPreviousText

Type: text

Description: The setting specifies a text which will be rendered as a tooltip for the ‘slideshow’ service ‘previous’ image button.

Front-end view:

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.16.4 SlideshowButtonNextText

Type: text

Description: The setting specifies a text which will be rendered as a tooltip for the ‘slideshow’ service ‘next’ image button.

Front-end view:

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.16.5 SlideshowThumbnailsLabel

Type: text

Description: The setting specifies text for the header of the ‘slideshow’ service ‘thumbnails’ section.

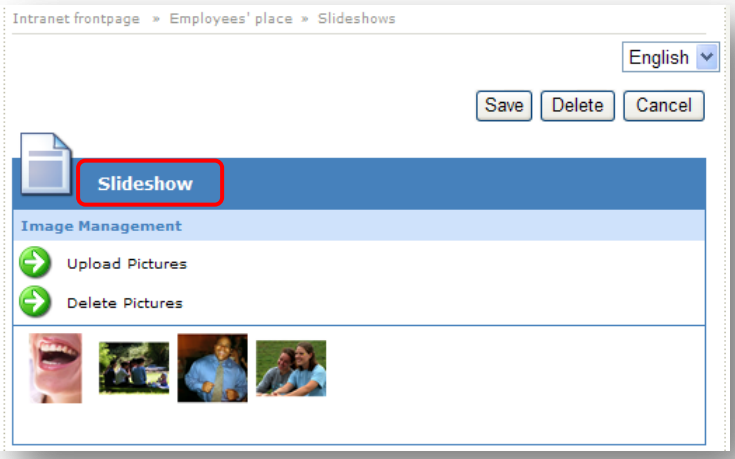
Front-end view:

1.16.6 SlideshowEditorTitle

Type: text

Description: The setting specifies a text for the title which will be rendered on the Sitecore Intranet Portal front-end editor above the control which allows manipulating with images of a current slideshow if a user edits an item based on the ‘Intranet.Slideshow’ template.

Front-end view:



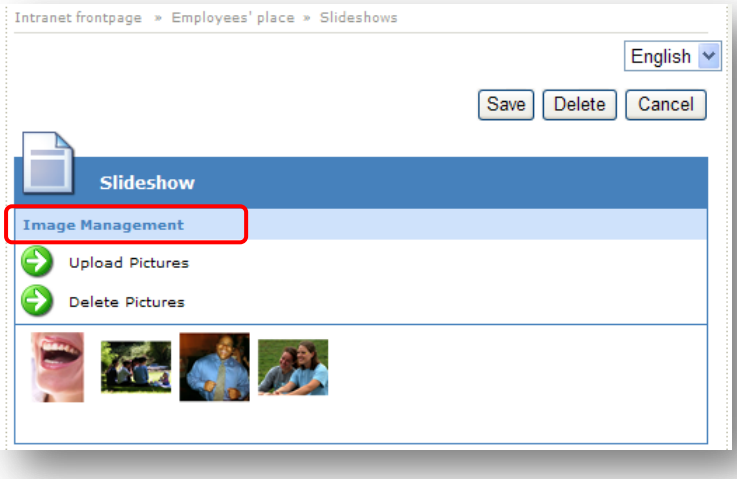
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.16.7 SlideshowEditorSubTitle

Type: text

Description: The setting specifies a text for the title which will be rendered on the Sitecore Intranet Portal front-end editor as a header for the control which allows manipulating with images of a current slideshow if a user edits item based on the 'Intranet.Slideshow' template.

Front-end view:

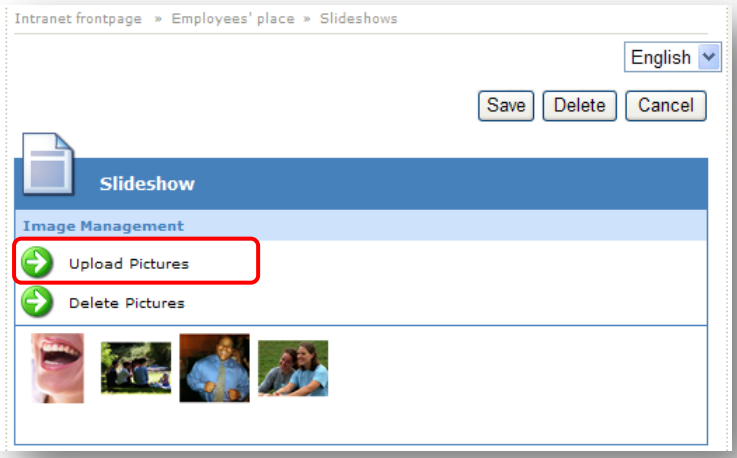


1.16.8 SlideshowEditorUpload

Type: text

Description: The setting specifies a text which will be rendered as a caption for the 'upload pictures' button in the control which allows manipulating with images of a current slideshow from the Sitecore Intranet Portal front-end editor.

Front-end view:



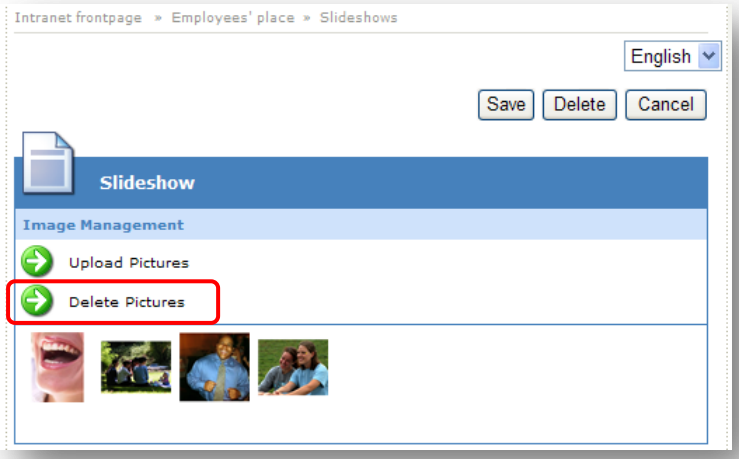
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.16.9 SlideshowEditorDelete

Type: text

Description: The setting specifies a text which will be rendered as a caption for the ‘delete pictures’ button in the control which allows manipulating with images of a current slideshow from the Sitecore Intranet Portal front-end editor.

Front-end view:



Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.17 MediaLibrary

The description of settings located in the MediaLibrary section of the Main Settings item.

1.17.1 MediaPickerPublicRoot

Type: tree

Description: The setting specifies:

1) an item which will be used as a public root item for the Sitecore Media Picker service. It means that Media Picker will allow users upload items to Media Library only under an item in the Sitecore Media Library.
2) Also the setting affects the behavior of the 'insert internal link' service embedded into the Rich Text Editor. A user can insert a link using this service only to those media items which are placed under an item in Sitecore content tree which is referenced by the setting.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

Front-end view:

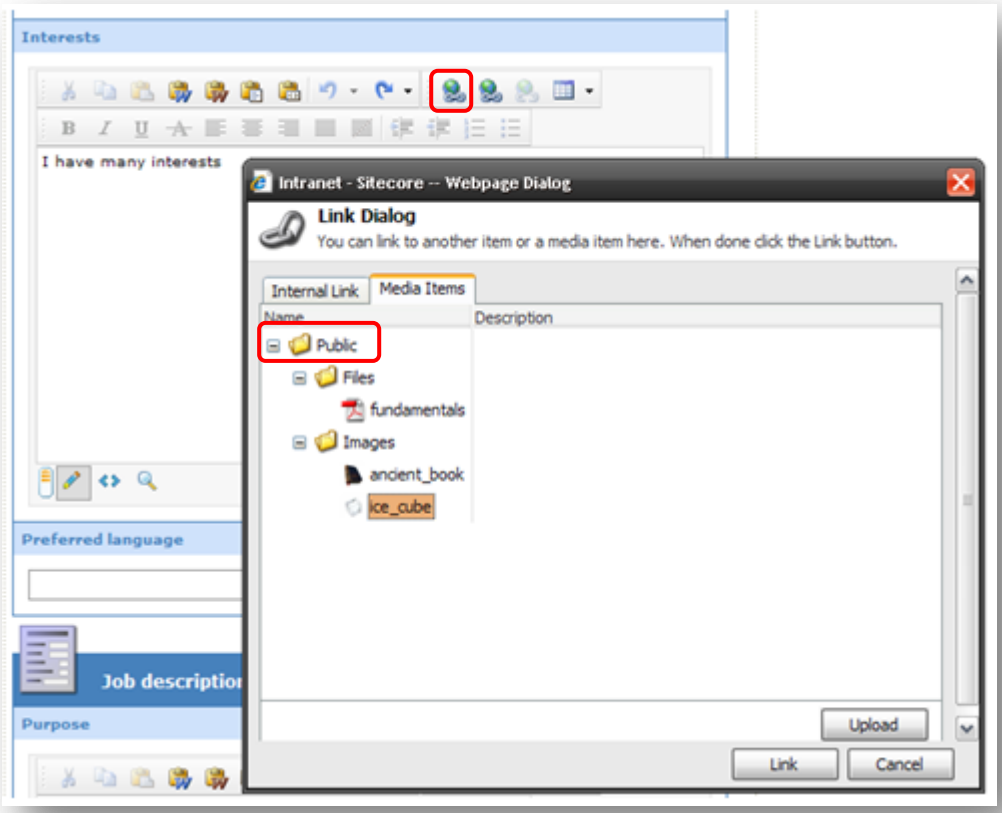
Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

2) the ‘insert internal link’ service embedded into the Rich Text Editor



1.17.2 Max Image Width (MaxImageWidth)

Type: text

Description: The setting specifies the maximum width of image which will be rendered on a page. If an image width is greater than the value of the setting, the image will be scaled to fit the specified width. By default, the setting affects the behavior of the ‘sc:scaledImage’ xsl control.

1.17.3 ListMaxImageWidth

Type: text

Description: The setting specifies the maximum width of images which will be rendered in the list of items. If an image width is greater than the value of the setting then the image will be scaled to fit the specified width. By default, this setting affects the behavior of the ‘Intranet NewsArchive’ sublayout (assigned to ‘Intranet.NewsArchive’ template), the ‘Intranet NewsFrontpage’, the ‘Intranet NewsList’(assigned to the ‘Intranet.NewsSection’ template) renderings and the ‘Corporate news’ web part.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.18 System Folders

The description of settings located in the System Folders section of the Main Settings item.

1.18.1 ActivityCalendarFolder

Type: reference

Description: The setting specifies a reference to the item under which all intranet activities are stored.

1.18.2 ActivityTypesFolder

Type: reference

Description: The setting specifies a reference to the item under which all intranet activity types are stored.

1.18.3 DocumentTypesFolder

Type: reference

Description: The setting specifies a reference to the item under which all known document types are stored.

1.18.4 LocationsFolder

Type: reference

Description: The setting specifies a reference to the item under which all locations are stored.

1.18.5 PortalZonesFolder

Type: reference

Description: The setting specifies a reference to the item under which configuration for Sitecore Intranet Portal front page web parts are stored.

1.18.6 TargetGroupsFolder

Type: reference

Description: The setting specifies a reference to the item under which the hierarchy of the site target groups for the data channeling framework are stored.

1.18.7 TopIconLinksFolder

Type: reference

Description: The setting specifies a reference to the item under which all entries for the site top icon links are stored.

1.18.8 UserProfileFolder

Type: reference

Description: The setting specifies the reference to the item under which all items that store extra data for user profiles are placed.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.

1.18.9 SlideshowsFolder

Type: reference

Description: The setting specifies the reference to the media library folder under which all slideshows images are stored.

Sitecore® is a registered trademark. All other brand and product names are the property of their respective holders. The contents of this document are the property of Sitecore. Copyright © 2001-2011 Sitecore. All rights reserved.
